

UNI-PRESIDENT ENTERPRISES CORP.
PARENT COMPANY ONLY NON-CONSOLIDATED
FINANCIAL STATEMENTS AND REPORT OF
INDEPENDENT ACCOUNTANTS
DECEMBER 31, 2014 AND 2013

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

We have audited the accompanying non-consolidated balance sheets of Uni-President Enterprises Corp. as of December 31, 2014 and 2013, and the related non-consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended. These non-consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these non-consolidated financial statements based on our audits. We did not audit the financial statements of certain investee companies accounted for under the equity method. Investments in these companies amounted to \$7,417,935 thousand and \$7,491,120 thousand as of December 31, 2014 and 2013, respectively, and the related share of profit of subsidiaries, associates and joint ventures accounted for under the equity method amounted to \$812,487 thousand and \$769,416 thousand for the years then ended, respectively. Those financial statements and the information disclosed in Note 13 were audited by other auditors whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the financial statements and the information disclosed in Note 13 relative to these investments, is based solely on the audit reports of the other auditors.

We conducted our audits in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants" and generally accepted auditing standards in the Republic of China. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other auditors, the non-consolidated financial statements referred to above present fairly, in all material respects, the financial position of Uni-President Enterprises Corp. as of December 31, 2014 and 2013, and its financial performance and cash flows for the years then ended in conformity with the "Rules Governing the Preparations of Financial Statements by Securities Issuers".

According to Financial-Supervisory-Securities-Auditing No. 1030010325 issued on April 3, 2014, commencing 2015, companies with shares listed on the TWSE or traded on the Taipei Exchange or Emerging Stock Market shall adopt the 2013 version of IFRS (not including IFRS 9, 'Financial instruments') as endorsed by the FSC and the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" effective January 1, 2015 (collectively referred herein as the "2013 version of IFRSs") in preparing the non-consolidated financial statements. The related new standards, interpretations and amendments are listed below:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective Date by International Accounting Standards Board</u>
Limited exemption from comparative IFRS 7 disclosures for first-time adopters (amendments to IFRS 1)	July 1, 2010
Severe hyperinflation and removal of fixed dates for first-time adopters (amendments to IFRS 1)	July 1, 2011
Government loans (amendments to IFRS 1)	January 1, 2013
Disclosures—Transfers of financial assets (amendments to IFRS 7)	July 1, 2011

<u>New Standards, Interpretations and Amendments</u>	Effective Date by International Accounting Standards Board
Disclosures—Offsetting financial assets and financial liabilities (amendments to IFRS 7)	January 1, 2013
IFRS 10, ‘Consolidated financial statements’	January 1, 2013 (Investment entities: January 1, 2014)
IFRS 11, ‘Joint arrangements’	January 1, 2013
IFRS 12, ‘Disclosure of interests in other entities’	January 1, 2013
IFRS 13, ‘Fair value measurement’	January 1, 2013
Presentation of items of other comprehensive income (amendments to IAS 1)	July 1, 2012
Deferred tax: recovery of underlying assets (amendments to IAS 12)	January 1, 2012
IAS 19 (revised), ‘Employee benefits’	January 1, 2013
IAS 27, ‘Separate financial statements’ (as amended in 2011)	January 1, 2013
IAS 28, ‘Investments in associates and joint ventures’ (as amended in 2011)	January 1, 2013
Offsetting financial assets and financial liabilities (amendments to IAS 32)	January 1, 2014
IFRIC 20, ‘Stripping costs in the production phase of a surface mine’	January 1, 2013
Improvements to IFRSs 2010	January 1, 2011
Improvements to IFRSs 2009—2011	January 1, 2013

Based on the Company’s assessment, the adoption of the 2013 version of IFRSs has no significant impact on the non-consolidated financial statements of the Company, except the following:

A.IAS 1, ‘Presentation of financial statements’

The amendment requires entities to separate items presented in OCI classified by nature into two groups on the basis of whether they are potentially reclassifiable to profit or loss subsequently when specific conditions are met. If the items are presented before tax then the tax related to each of the two groups of OCI items (those that might be reclassified and those that will not be reclassified) must be shown separately. Accordingly, the Group will adjust its presentation of the statement of comprehensive income.

B.IFRS 12, ‘Disclosure of interests in other entities’

The standard integrates the disclosure requirements for subsidiaries, joint arrangements, associates and unconsolidated structured entities. Also, the Company will disclose additional information about its interests in consolidated entities and non-consolidated entities accordingly.

C.IFRS 13, ‘Fair value measurement’

The standard defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The standard sets out a framework for measuring fair value using the assumptions that market participants would use when pricing the asset or liability; for non-financial assets, fair value is determined based on the highest and best use of the asset. Also, the standard requires disclosures about fair value measurements. Based on the Company’s assessment, the adoption of the standard has no significant impact on its non-consolidated financial statements, and the

Company will disclose additional information about fair value measurements accordingly.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the 2013 version of IFRSs as endorsed by the FSC:

<u>New Standards, Interpretations and Amendments</u>	Effective Date by International Accounting Standards Board
IFRS 9, 'Financial instruments'	January 1, 2018
Sale or contribution of assets between an investor and its associate or joint venture (amendments to IFRS 10 and IAS 28)	January 1, 2016

IFRIC 21, 'Levies'	January 1, 2014
Improvements to IFRSs 2010-2012	July 1, 2014
Improvements to IFRSs 2011-2013	July 1, 2014
Improvements to IFRSs 2012-2014	January 1, 2016

The Company is assessing the potential impact of the new standards, interpretations and amendments above. The impact on the non-consolidated financial statements will be disclosed when the assessment is complete.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these non-consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The non-consolidated financial statements of the Company have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers".

(2) Basis of preparation

A. Except for the following items, the non-consolidated financial statements have been prepared under the historical cost convention:

(a) Financial assets and financial liabilities (including derivative instruments) at fair value

through profit or loss.

(b) Available-for-sale financial assets measured at fair value.

(c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Foreign currency translation

Items included in the financial statements of each of the Group’s entities are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”). The non-consolidated financial statements are presented in New Taiwan Dollars, which is the Company’s functional and presentation currency.

Foreign currency transactions and balances

A. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.

B. Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.

C. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

D. All foreign exchange gains and losses are presented in the statement of comprehensive income within ‘other gains and losses’.

(4) Classification of current and non-current items

A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:

(a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;

(b) Assets held mainly for trading purposes;

(c) Assets that are expected to be realised within twelve months from the balance sheet date;

(d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

(a) Liabilities that are expected to be paid off within the normal operating cycle;

(b) Liabilities arising mainly from trading activities;

(c) Liabilities that are to be paid off within twelve months from the balance sheet date;

(d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(5) Cash equivalents

- A. Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.
- B. Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(6) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets held for trading or financial assets designated as at fair value through profit or loss on initial recognition. Financial assets are classified in this category if held for trading if acquired principally for the purpose of selling in the short-term. Derivatives are also categorized as financial assets held for trading unless they are designated as hedges. Financial assets that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:
 - (a) Hybrid (combined) contracts; or
 - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
 - (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. Financial assets at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed in profit or loss. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in profit or loss.

(7) Available-for-sale financial assets

- A. Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories.
- B. On a regular way purchase or sale basis, available-for-sale financial assets are recognised and derecognised using trade date accounting.
- C. Available-for-sale financial assets are initially recognised at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in other comprehensive income. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in 'financial assets measured at cost'.

(8) Loans and receivables

Accounts receivable

Accounts receivable are loans and receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. Accounts receivable are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. However, short-term accounts receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(9) Impairment of financial assets

- A. The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired as a result of one or more events that

occurred after the initial recognition of the asset (a ‘loss event’) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

B.The criteria that the Company uses to determine whether there is objective evidence of an impairment loss is as follows:

- (a)Significant financial difficulty of the issuer or debtor;
- (b)The disappearance of an active market for that financial asset because of financial difficulties;
- (c)Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;
- (d)Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered;
- (e)A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

C.When the Company assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:

(a)Financial assets measured at amortised cost

The amount of the impairment loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows discounted at the financial asset’s original effective interest rate, and is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortised cost that would have been at the date of reversal had the impairment loss not been recognised previously. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(b)Financial assets measured at cost

The amount of the impairment loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows discounted at current market return rate of similar financial asset, and is recognised in profit or loss. Impairment loss recognised for this category shall not be reversed subsequently. Impairment loss is recognised by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(c)Available-for-sale financial assets

The amount of the impairment loss is measured as the difference between the asset’s acquisition cost (less any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss, and is reclassified from ‘other comprehensive income’ to ‘profit or loss’. If, in a subsequent period, the fair value of an investment in a debt instrument increases, and the increase can be related objectively to an event occurring after the impairment loss was recognised, then such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognised in profit or loss shall not be reversed through profit or loss. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(10) Derecognition of financial assets

The Company derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows from the financial asset have been transferred and the Company has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows from the financial asset have been transferred; however, the Company has not retained control of the financial asset.

(11) Lease

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.
- B. An operating lease is a lease other than a financial lease. Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.
- C. The maintenance expenses for leased items are listed as operating cost in the current period. However, when the lease items become purchasable, the book value of these items are listed as "Inventories". Under IAS 18, 'Income,' the revenues generated from the sales of these items are listed as income.

(12) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(13) Investments accounted for under equity method / associates

- A. A subsidiary is an entity where the Company has the right to dominate its finance and operation policies (including special purpose entities), normally the Company owns more than 50% of the voting rights directly or indirectly in that entity. Subsidiaries are accounted for under equity method in the Company's non-consolidated financial statements.
- B. Unrealized gains or losses resulting from inter-company transactions with subsidiaries are eliminated. Necessary adjustments are made to the accounting policies of subsidiaries, to be consistent with the accounting policies of the Company.
- C. After acquisition of subsidiaries, the Company recognizes proportionately the share of profit and loss and other comprehensive income in the income statement as part of the Company's profit and loss and other comprehensive income, respectively. When the share of loss from a subsidiary exceeds the carrying amount of Company's interest in that subsidiary, the Company continues to recognize its share in the subsidiary's loss proportionately.
- D. Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.
- E. Associates are all entities over which the Company has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 per cent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- F. The Company's share of its associates' post-acquisition profits or losses is recognised in profit

or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

- G. When changes in an associate's equity are not recognised in profit or loss or other comprehensive income of the associate and such changes do not affect the Company's ownership percentage of the associate, the Company recognises the Company's share of change in equity of the associate in 'capital surplus' in proportion to its ownership.
- H. Unrealised gains on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
- I. In the case that an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Company's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
- J. Upon loss of significant influence over an associate, the Company remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.
- K. When the Company disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associates are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate then the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- L. When the Company disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, then the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.
- M. According to "Rules Governing the Preparations of Financial Statements by Securities Issuers", 'profit for the year' and 'other comprehensive income for the year' reported in an entity's non-consolidated statement of comprehensive income, shall equal to 'profit for the year' and 'other comprehensive income' attributable to owners of the parent reported in that entity's consolidated statement of comprehensive income. Total equity reported in an entity's non-consolidated financial statements, shall equal to equity attributable to owners of parent reported in that entity's consolidated financial statements.

(14) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as

appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

- C.Except for land, other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each component of property, plant and equipment is significant, it is depreciated separately.
- D.The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

<u>Asset</u>	<u>Useful lives</u>
Buildings	2 ~ 55 years
Machinery and utilities equipment	2 ~ 19 years
Transportation equipment	2 ~ 5 years
Office equipment	1 ~ 11 years
Leasehold improvements	2 ~ 28 years
Other equipment	2 ~ 30 years

(15) Leased assets/ leases (lessee)

Payments made under an operating lease, net of any incentives received from the lessor, are recognised in profit or loss on a straight-line basis over the lease term.

(16) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Except for land, investment property is depreciated on a straight-line basis over its estimated useful life of 15 ~ 55 years.

(17) Impairment of non-financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

(18) Borrowings

A.Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

B.Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

(19) Notes and accounts payable

Notes and accounts payable are obligations to pay for goods or services that have been acquired in

the ordinary course of business from suppliers. They are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. However, short-term accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(20) Financial liabilities at fair value through profit or loss

A. Financial liabilities at fair value through profit or loss are financial liabilities held for trading or financial liabilities designated as at fair value through profit or loss on initial recognition. Financial liabilities are classified in this category if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:

- (a) Hybrid (combined) contracts; or
- (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
- (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.

B. Financial liabilities at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed in profit or loss. These financial liabilities are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial liabilities are recognised in profit or loss.

(21) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(22) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(23) Financial liabilities and equity instruments

Ordinary corporate bonds issued by the Company are initially recognised at fair value, net of transaction costs incurred. Ordinary corporate bonds are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is accounted for as the premium or discount on bonds payable and presented as an addition to or deduction from bonds payable, which is amortised in profit or loss as an adjustment to the 'finance costs' over the period of bond circulation using the effective interest method.

(24) Derivative financial instruments

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Any changes in the fair value are recognised in profit or loss. Derivatives that are linked to unquoted equity instruments without reliably measured fair value and must be settled by delivery of such unquoted equity instruments are presented in 'financial assets or financial liabilities measured at cost'.

(25) Provisions

Provisions (including decommissioning) are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.

(26) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expenses in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expenses when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised past service costs. The defined benefit net obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds (at the balance sheet date) instead.
- ii. Actuarial gains and losses arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise, and presented in retained earnings.
- iii. Past service costs are recognised immediately in profit or loss if vested immediately; if not, the past service costs are amortised on a straight-line basis over the vesting period.

C. Employees' bonus and directors' and supervisors' remuneration

Employees' bonus and directors' and supervisors' remuneration are recognised as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. However, if the accrued amounts for employees' bonus and directors' and supervisors' remuneration are different from the actual distributed amounts as resolved by the stockholders at their stockholders' meeting subsequently, the differences should be recognised based on the accounting for changes in estimates. The Company calculates the number of shares of employees' stock bonus based on the fair value per share at the previous day of the stockholders' meeting held in the year following the financial reporting year, and after taking into account the effects of ex-rights and ex-dividends.

(27) Income tax

A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.

B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It

establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the non-consolidated balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. A deferred income tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilised.

(28) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(29) Revenue recognition

The Company manufactures and sells various soft drinks, food, animal feeds, sauces, vegetable oil, and medicine, etc. Revenue is measured at the fair value of the consideration received or receivable taking into account the value-added tax, returns, rebates and discounts for the sale of goods to external customers in the ordinary course of the Company's activities. Revenue arising from the sales of goods should be recognized when the Company has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards of ownership have been transferred to the customer, the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these non-consolidated financial statements requires management to make critical

judgements in applying the Company's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. The related information is addressed below:

(1) Critical judgements in applying the Company's accounting policies

A.Financial assets - impairment of equity investments

The Company follows the guidance of IAS 39 to determine whether a financial asset-equity investment is impaired. This determination requires significant judgement. In making this judgement, the Company evaluates, among other factors, the duration and extent to which the fair value of an equity investment is less than its cost and the financial health of and short-term business outlook for the investee, including factors such as industry and sector performance, changes in technology and operational and financing cash flow.

B.Investment property

The Company uses a portion of the property for its own use and another portion to earn rentals or for capital appreciation. When these portions cannot be sold separately and cannot be leased out separately under finance lease, the property is classified as investment property only if the own-use portion accounts for less than 10% of the property.

(2) Critical accounting estimates and assumptions

A.Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realisable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

For more information regarding the carrying amount of inventories as of December 31, 2014, please refer to Note 6(5).

B.Impairment assessment of investments accounted for using equity method

The Company assesses the impairment of an investment accounted for under equity method as soon as there is any indication that it might have been impaired and its carrying amount may be recoverable. The Company assesses the recoverable amounts of an investment accounted for under equity method based on the present value of expected cash dividends receivable from the investee and expected future cash flows from the disposal of the investee, and analyses the reasonableness of related assumptions.

For more information regarding the carrying amount of the Company's investments accounted for under equity method as of December 31, 2014, please refer to Note 6(8).

C.Impairment assessment of tangible assets

The Company assesses impairment based on its subjective judgement and determines the separate cash flows of a specific group of assets, useful lives of assets and the future possible income and expenses arising from the assets depending on how assets are utilised and industrial characteristics. Any changes of economic circumstances or estimates due to the change of Company strategy might cause material impairment on assets in the future.

For more information regarding the Company's impairment on assets as of December 31, 2014, please refer to Note 6(11).

D.Realisability of deferred income tax assets

Deferred income tax assets are recognised only to the extent that it is probable that future taxable

profit will be available against which the deductible temporary differences can be utilised. Assessment of the realisability of deferred income tax assets involves critical accounting judgements and estimates of the management, including the assumptions of expected future sales revenue growth rate and profit rate, tax exempt duration, available tax credits, tax planning, etc. Any variations in global economic environment, industrial environment, and laws and regulations might cause material adjustments to deferred income tax assets.

For more information regarding the Company's recognized deferred income tax assets as of December 31, 2014, please refer to Note 6(27).

E.Calculation of accrued pension obligations

When calculating the present value of defined pension obligations, the Company must apply judgements and estimates to determine the actuarial assumptions on balance sheet date, including discount rates and expected rate of return on plan assets. Any changes in these assumptions could significantly impact the carrying amount of defined pension obligations.

For more information regarding the Company's accrued pension liabilities as of December 31, 2014, please refer to Note 6(16).

If the adopted discount rate had increased/decreased by 0.25%, the Company's accrued pension liabilities would have decreased/increased by \$265,446 and \$276,548, respectively.

Adjustments of available-for-sale financial assets	1,350	1,350
	<u>\$ 6,150</u>	<u>\$ 6,150</u>

- A. The Company recognised \$911 and (\$8,182) in other comprehensive income for fair value change and tax adjustment for the years ended December 31, 2014 and 2013, respectively.
B. On June 20, 2013, shareholders of Prince Housing and Development Corporation (the 'Prince

Housing'), the Company's investee company accounted for as available-for-sale financial assets, had adopted a resolution during the shareholders' meeting, to re-elect its directors and supervisors. After the re-election, the Company had obtained additional seats in the board of directors of Prince Housing and were determined to be able to exercise significant influence on the operations of Prince Housing. As a result, the Company changed its accounting treatment on its investment in Prince Housing to equity method retrospectively.

C.The Company has no available-for-sale financial assets pledged to others as of December 31, 2014 and 2013.

(7) Financial assets carried at cost - non-current

	<u>December 31, 2014</u>	<u>December 31, 2013</u>

Less: Accumulated impairment	(207,413)	(181,714)
	<u>\$ 351,049</u>	<u>\$ 381,414</u>

A.The Company classified some of its equity investments as available-for-sale financial assets, based on its intention. However, as these stocks are not traded in active market, and there is no sufficient information of similar companies in the same industry, fair value of the investments cannot be measured reliably. Accordingly, the Company classified those stocks as "financial assets carried at cost" .

B.The Company's investee, Kunji Venture Capital Corp., had been experiencing financial difficulties, so the Company recognized an impairment loss of \$25,699 (shown as "Other gains and losses") for the year ended December 31, 2014.

C.The Company has no financial assets carried at cost pledged to others as of December 31, 2014 and 2013.

(19) Retained earnings

- A.Pursuant to the amended Company Law, the current year's after-tax earnings should be used initially to cover any accumulated deficit; thereafter 10% of the remaining earnings should be set aside as legal reserve until the balance of legal reserve is equal to that of paid-in capital. The legal reserve shall be exclusively used to cover accumulated deficit, to issue new stocks or distribute cash to shareholders in proportion to their share ownership. The use of legal reserve for the issuance of stocks or cash dividends to shareholders in proportion to their share ownership is permitted provided that the balance of such reserve exceeds 25% of the Company's paid-in capital.
- B.Since the Company is in a changeable industry environment and the life cycle of the Company is in a stable growth, the appropriation of earnings should consider fund requirements and capital budgets to decide how much earnings will be kept or distributed and how much cash dividends will be distributed. According to the Company's Articles of Incorporation, 10% of the annual net income, after offsetting any loss of prior years and paying all taxes and dues, shall be set aside as legal reserve. The remaining net income and the unappropriated retained earnings from prior years can be distributed in accordance with a resolution passed during a

meeting of the Board of Directors and approved at the stockholders' meeting. Of the amount to be distributed by the Company, stockholders' bonuses shall comprise 50% to 100% of the unappropriated retained earnings, and the percentage of cash dividends shall not be less than 30% of dividends distributed. Directors' and supervisors' remuneration shall comprise 2% and at least 0.2% for employees' bonuses.

- C.In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings. The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently. The Company proportionately recognized the reversal of special reserval of \$619 for both the years ended December 31, 2014 and 2013.
- D.For the years ended December 31, 2014 and 2013, employees' bonus and directors' and supervisors' remuneration were accrued at \$1,165,759 and \$1,292,985, respectively, which were based on the after tax earnings of related periods, considering legal reserve calculated by the percentage prescribed under the Company's Articles of Incorporation. The actual amount approved at the shareholders' meeting for employees' bonus and directors' and supervisors' remuneration for 2013 was \$1,296,964, which was different from the estimated amount recognized in the 2013 financial statements by \$3,979. Such difference was recognized in profit and loss for the year ended December 31, 2014. Information about the appropriation of employees' bonus and directors' and supervisors' remuneration by the Company as proposed by the Board of Directors and resolved by the stockholders will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.
- E.The Company recognized dividends distributed to owners amounting to \$9,724,949 (\$1.40 (in dollars) per share as cash dividend and \$0.60 (in dollars) per share as stock dividends) for the year ended December 31, 2013. On June 24, 2014, the stockholders during their meeting proposed total dividends for 2013 of \$10,823,868, constituting \$1.50 (in dollars) per share for cash dividends and \$0.6 (in dollars) per share for stock dividends. On March 26, 2015, the Board of Directors during its meeting proposed total dividends for 2014 of \$9,834,257, constituting \$1.40 (in dollars) per share for cash dividends and \$0.6 (in dollars) per share for stock dividends.
- F. In accordance with relevant laws and regulations of R.O.C., the long-term equity investment accounted for using equity method – President Securities Corp. has set aside a special reserve for trading losses and default losses from the annual post tax profit. The special reserve shall not be used for any other purpose except for covering the losses of President Securities Corp. or, when the special reserve reaches 50% of the amount of paid-in capital, 50% of the special reserve may be used for capitalization. As of December 31, 2014, the Group recognized special

reserve of \$105,429 in accordance with IAS 28, "Investments in Associates and Joint Ventures". G.The Group sold its investment in Cargill President Holdings Pte. Ltd. in 2013. However, as the Group has elected to reset the cumulative translation difference from foreign operations to zero at the date of transition to IFRSs, it increased its retained earnings and set aside a special reserve on the date of transition. On the date of disposal of the aforementioned investments, the Group reversed proportionately the special reserve of \$72,443 for the year ended December 31, 2013. There is no such item for the year ended December 31, 2014.

Employees' bonus	-	-	
Profit attributable to ordinary shareholders plus assumed conversion of all dilutive potential ordinary shares	\$ 12,764,241	5,486,399	\$ 2.33

A. The abovementioned weighted average number of ordinary shares outstanding to conversion has been adjusted to unappropriated retained earnings as proportional increase in capital for the year

ended December 31, 2013.

B. As employees' bonus could be distributed in the form of stock, the diluted EPS computation shall include those estimated shares that would increase from employees' stock bonus issuance in the weighted-average number of common shares outstanding during the reporting year, taking into account the dilutive effects of stock bonus on potential common shares; whereas, basic EPS shall be calculated based on the weighted-average number of common shares outstanding during the reporting year that include the shares of employees' stock bonus for the appropriation of prior year earnings, which have already been resolved at the stockholders' meeting held in the reporting year. Since capitalization of employees' bonus no longer belongs to distribution of stock dividends, the calculation of basic EPS and diluted EPS for all periods presented shall not be adjusted retroactively.

(29) Operating leases

A. The Company leases out some equipment, property investments, and some stores in shopping malls to others under non-cancellable operating lease agreements. - (2) As of December 31, 2014 and 2013, the remaining balance due for construction in progress and prepayments for equipment was \$4,348,603 and \$5,279,274, respectively.
- (3) The conditions of endorsement and guarantees provided by the Company to entities are described in Note 13(1)-B.
- (4) In July 2000, President Chain Store Corp. signed a perpetual technical cooperation contract (the Contract) with Southland Corporation. The terms of the Contract are as follows:
 - A.The Company guarantees that President Chain Store Corp. will fulfill all payments or other obligations due under the Contract to Southland Corporation.
 - B.Without the written approval of Southland Corporation in advance, the Company may not sell, transfer, or pledge the ownership or the assets of President Chain Store Corp.
 - C.The Company should maintain no less than 40% ownership of President Chain Store Corp.
- (5) The Company entered into credit facilities agreements with the Bank of Tokyo-Mitsubishi in December 2013 and September 2014, respectively, and terms of agreements were from December 31, 2013 to December 30, 2016 and September 30, 2014 to September 7, 2018, respectively. Under the terms of the agreements, the Company agreed that:
 - A.The current ratio computed from the year-end audited non-consolidated financial statements shall not be below 75%.
 - B.The debt-to-equity ratio computed from the year-end audited non-consolidated financial statements shall not be above 150%.
 - C.The interest coverage ratio computed from the year-end audited non-consolidated financial statements shall not be below 150%.
 - D.The year-end audited consolidated tangible stockholders' equity shall not be less than \$30,000,000.
- (6) Due to the plasticizer food scandal, the Consumers' Foundation, Chinese Taipei (CFCT) filed a lawsuit against the Company with the Banciao District Court and claimed \$1,573,775 for punitive and damage penalty in March, 2012. The New Taipei District Court had been pronouncing a judgment on this case on October 17, 2013, and that the Company should pay \$88 to the plaintiff for damage penalty, In addition, the punitive penalty was not approved by court because the Company was unaware of such plasticizer ingredient in its manufacture process. The CFCT has filed an appeal with the Taiwan High Court.

10. SIGNIFICANT DISASTER LOSS:

None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE:

None.

12. OTHERS

(1) Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders, maintain an optimal capital structure to both reduce the cost of capital and to meet the monetary needs of improving productivity. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

(2) Financial instruments

A. Fair value information of financial instruments

Except for items disclosed in the table below, the financial instruments not measured at fair value (including cash and cash equivalents, financial assets and liabilities at fair value through profit or loss, notes receivable, accounts receivable (including related parties), other receivables (including related parties), short-term borrowings, notes payable, accounts payable (including related parties), and other payables (including related parties) are based on their book value as book value approximates to fair value. The fair value information of financial instruments measured at fair value is provided in Note 12 (3), Fair value estimation.

	December 31, 2014		December 31, 2013	
	Book Value	Fair Value	Book Value	Fair Value
Financial assets:				
Guarantee deposits paid	\$ 146,869	\$ 146,869	\$ 142,002	\$ 142,002
Financial liabilities:

Long-term borrowings (Inclusive of current portion)	13,248,876	13,248,876	10,988,274	10,988,274
Guarantee deposits	88,764	88,764	87,951	87,951

B. Financial risk management policies

(a) The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial position and financial performance.

(b) Risk management is carried out by a central treasury department (Company treasury) under policies approved by the board of directors. Company treasury identifies, evaluates and hedges financial risks in close cooperation with the Company's operating units. The Board

provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C.Significant financial risks and degrees of financial risks

(a)Market risk

Foreign exchange risk

- (i)Because the Company is primarily operating in domestic markets, the foreign exchange risk from foreign different currency fluctuation is limited. The currency used for export trade is priced in US dollars. Any foreign exchange risk arises from the net investments in foreign operations.
- (ii) Some purchases and sales are valued in US dollars, therefore the fair value changes with market exchange rate. The Company holds equivalent assets and liabilities in foreign currencies, and the period of collection and payment is equivalent to offset the market risk, thus the risk is minimal; therefore, no major foreign exchange risk is expected.
- (iii)The net investments in foreign operations face risk arising from currencies exchange rates. While these investments were strategically planned, the Company does not hedge against the risk incurred deliberately.
- (iv)The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

	December 31, 2014		
	Foreign currency amount (in thousands)	Exchange rate	Book value
(foreign currency: functional currency)			
<u>Financial assets</u>			
<u>Monetary items</u>			
USD : NTD	\$ 2,067	31.65	\$ 65,424
<u>Investment accounted for under equity method</u>			
USD : NTD	1,467,289	30.68	45,013,710
<u>Financial liabilities</u>			
<u>Monetary items</u>			
USD : NTD	1,024	31.70	32,464

December 31, 2013

	<u>Foreign currency amount (in thousands)</u>	<u>Exchange rate</u>	<u>Book value</u>
(foreign currency: functional currency)			
<u>Financial assets</u>			
<u>Monetary items</u>			
USD : NTD	\$ 3,200	29.76	\$ 95,232
<u>Investment accounted for under equity method</u>			
USD : NTD	1,222,869	29.07	35,548,802
<u>Financial liabilities</u>			
<u>Monetary items</u>			
USD : NTD	2,627	29.86	78,442

(v)The influence due to the fluctuations of the exchange rate between NTD and USD is primarily from cash and cash equivalents, accounts receivables, other receivables, financial assets accounted for under equity method, and borrowings denominated in USD. As of December 31, 2014 and 2013, if the NTD:USD exchange rate appreciates/depreciates by 1% with all other factors remaining constant, the Company's post-tax profit for the years then ended would increase/decrease by \$373,887 or increase/decrease by \$295,219, respectively.

Price risk

The Company is exposed to equity securities price risk because of investments held by the Company and classified on the non-consolidated balance sheet either as available-for-sale or at fair value through profit or loss. The Company is not exposed to commodity price risk. To manage its price risk arising from investments in equity securities, the Company has carefully determined its investing portfolio and has set various stop loss points to ensure that stockholders are not exposed to significant risks.

The Company's investments in equity securities comprise domestic listed and unlisted stocks. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 2% with all other variables held constant, post-tax profit for the years ended December 31, 2014 and 2013 would have increased/decreased by \$68,000 and \$60,000 as a result of gains/losses on equity securities classified as at fair value through profit or loss, respectively. Other components of equity would have increased/decreased by \$123 equally as a result of gains/losses on equity securities classified as available-for-sale.

Interest rate risk

The Company's interest rate risk arises from short-term borrowings, long-term borrowings and bonds payable. Borrowings issued at variable rates expose the Company to cash flow

interest rate risk which is partially offset by cash and cash equivalents held at variable rate. Borrowings issued at fixed rates expose the Company to fair value interest rate risk. During the years ended December 31, 2014 and 2013, the Company's borrowings at variable rate were denominated in the NTD. If interest rates on borrowings had been 0.1% higher/lower with all other variables held constant, post-tax profit for the years ended December 31, 2014 and 2013 would have increased /decreased by \$11,025 and \$9,187, respectively, mainly as a result of higher/lower interest expense on floating rate borrowings.

(b) Credit risk

- (i) Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments on the contract obligations. According to the Company's credit policy, each local entity in the Company is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. The utilization of credit limits is regularly monitored. Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including outstanding receivables and committed transactions. For banks and financial institutions, only independently rated parties with good ratings are accepted.
- (ii) No credit limits were exceeded during the years ended December 31, 2014 and 2013, and management does not expect any significant losses from non-performance by these counterparties.
- (iii) For the credit ratings of the Company's financial assets, please refer to Note 6, "Financial assets".

(c) Liquidity risk

- (i) Cash flow forecasting is performed in Finance Division of the Company. Finance division monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Company does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities.
- (ii) The table below analyses the Company's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(note) Including principal and interest.

(3) Fair value estimation

A. The table below analyses financial instruments measured at fair value, by valuation method.

The different levels have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data.

The following table presents the Company's financial assets and liabilities that are measured at fair value at December 31, 2014 and 2013.

<u>December 31, 2014</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Financial assets:				
Financial assets at fair value through profit or loss	\$ 3,400,000	\$ -	\$ -	\$ 3,400,000
Available-for-sale financial assets	-	-	6,150	6,150
	<u>\$ 3,400,000</u>	<u>\$ -</u>	<u>\$ 6,150</u>	<u>\$ 3,406,150</u>

<u>December 31, 2013</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Financial assets:				
Financial assets at fair value through profit or loss	\$ 3,000,000	\$ -	\$ -	\$ 3,000,000
Available-for-sale financial assets	-	-	6,150	6,150
	<u>\$ 3,000,000</u>	<u>\$ -</u>	<u>\$ 6,150</u>	<u>\$ 3,006,150</u>

B. The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Company is the current bid price. These instruments are included in level 1. Instruments included in level 1 comprise primarily equity instruments and debt instruments classified as financial assets/financial liabilities at fair value through profit or loss or available-for-sale financial assets.

C. The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

D. If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

E. Specific valuation techniques used to value financial instruments include:

(a) Quoted market prices or dealer quotes for similar instruments.

(b) The fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted back to present value.

(c) Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

F. The following table presents the changes in level 3 instruments for the years ended December 31, 2014 and 2013.

	2014	2013
	<u>Equity Securities</u>	<u>Equity Securities</u>
At January 1 and December 31	<u>\$ 6,150</u>	<u>\$ 6,150</u>
