PARENT COMPANY ONLY FINANCIAL
STATEMENTS AND INDEPENDENT AUDITORS'
REPORT

DECEMBER 31, 2022 AND 2021

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

INDEPENDENT AUDITORS' REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of Uni-President Enterprises Corp.

Opinion

We have audited the accompanying parent company only balance sheets of Uni-President Enterprises Corp. (the “Company”) as of December 31, 2022 and 2021, and the related parent company only statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the parent company only financial statements, including a summary of significant accounting policies.

In our opinion, based on our audits and the reports of the other auditors (please refer to *Other Matter* section), the accompanying parent company only financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the parent company only financial statements* section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. Based on our audits and the reports of the other auditors, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Company’s 2022 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters for the Company's 2022 parent company only financial statements are stated as follows:

Evaluation of the ending balance of investments accounted for under the equity method

Please refer to Notes 4(14) and 6(7) for the accounting policy and the details of investments accounted for under equity method relating to this key audit matter.

Cayman President Holdings Ltd. and President Chain Store Corp., the Company's subsidiaries with the related ending balance of investments accounted for under equity method of \$79,549,903 thousand and \$15,186,635 thousand, both constituting 44% of the Company's total assets, respectively, were considered significant to the parent company only financial statements. Accordingly, evaluation of the ending balances of these investments accounted for under the equity method has been identified as one of the most significant matters in our audit, hence, the key audit matters reported in the financial statements of these subsidiaries are also included as key audit matters in our audit of the Company's parent company only financial statements as follows:

1. Cayman President Holdings Ltd. and its subsidiaries – Operating revenue – Sales of goods in Mainland China

Description

Cayman President Holdings Ltd. and its subsidiaries are engaged in a large volume of revenue transactions generated from sales to a large number of customers, including direct customers and distributors in many different areas in Mainland China. As such, it needs more time for good transportation and customer reception, which involves complicated judgement in determining the timing of transferring the rights and obligations and risks and rewards of ownership of goods to customers. As a result, it has been identified as one of the key audit matters of our annual audit for 2022.

How our audit addressed the matter

Our key audit procedures performed in respect of the above key audit matter included the following:

- (1) We understood, evaluated and validated management's controls in respect of the sales transactions.

In addition, we understood and tested the general control environment of the information technology systems and the automatic controls that were related to sales of goods and revenue recognition.

- (2) We conducted testing of revenue records using sampling techniques, by examining the relevant

supporting documents including customer orders, goods delivery notes and customer's receipt notes. In addition, we confirmed customers' balances of accounts receivable and amounts of transactions on a sampling basis, by considering the nature of transactions and characteristics of those customers.

- (3) We tested sales transactions that took place shortly before and after the balance sheet date, by reconciling recognized revenue with the goods delivery notes and customers' receipt notes, to assess whether revenue was recognized in the appropriate reporting periods.

2. President Chain Store Corp. and its subsidiaries — Completeness and accuracy of retail sales revenue

Description

Retail sales revenue of President Chain Store Corp. and its subsidiaries is recorded based on the point-of-sale (POS) terminals, which collect the information of item names of merchandise, quantity, sales price and total sales amount of each transaction using pre-established merchandise master file data (which contains information such as item names of merchandise, cost of purchase, retail price, combination sales promotions, etc.). After the daily closing process, each store manager uploads their sales information to the Enterprise Resource Planning ("ERP") system, which summarizes all sales and automatically generates sales revenue journal entries. Each store manager also prepares a daily cash report, which summarizes amounts of sales and methods of collections (including cash, gift certificates, credit cards and electronic payment devices, etc.) and cash from daily sales is deposited to the bank.

As retail sales revenue comprises numerous small amount transactions and highly relies on the POS and ERP systems, the process of summarizing and recording sales revenue through these systems is important with regard to the completeness and accuracy of the retail sales revenue figures, and thus has been identified as one of the key audit matters of our annual audit for 2022.

How our audit addressed the matter

Our key audit procedures performed in respect of the above key audit matter included the following:

- (1) We inspected and checked whether additions and changes to the merchandise master file data had been properly approved and supported by related documents;
- (2) We inspected and checked whether approved additions and changes to the merchandise master file data had been correctly entered in the merchandise master file;
- (3) We inspected and checked whether merchandise master file data had been periodically transferred to POS terminals in stores;
- (4) We inspected and checked whether sales information in POS terminals had been periodically and

completely transferred to the ERP system and sales revenue journal entries were automatically generated;

- (5) We inspected manual sales revenue journal entries and relevant documents;
- (6) We inspected daily cash reports and related documents;
- (7) We inspected cash deposit amounts recorded in daily cash reports and agreed them to bank remittance amounts.

3. President Chain Store Corp. and its subsidiaries – Cost-to-retail ratio of retail inventory method

Description

As the retailing business of President Chain Store Corp. and its subsidiaries involves various kinds of merchandise, the retail inventory method is used to estimate the ending balance of inventory and the cost of goods sold. The retail inventory method applies a ratio of costs over retail prices of goods purchased (known as cost-to-retail ratio) to come out with an estimate of the ending balance of inventory and the cost of goods sold. The determination of the cost-to-retail ratio relies highly on cost and retail price information recorded in the accounting system, and has thus been identified as one of the key audit matters of our annual audit for 2022.

How our audit addressed the matter

Our key audit procedures performed in respect of the above key audit matter included the following:

- (1) We interviewed the management to understand the calculation process of the cost-to-retail ratio under the retail inventory method, and inspected whether it had been consistently applied in the comparative periods of the financial statements;
- (2) We inspected and checked whether additions and changes to the merchandise master file data (including item names of merchandise, cost of inventory, retail price, combination sales promotions, etc.) had been properly approved and the data had been correctly entered in the merchandise master file;
- (3) We inspected and checked whether costs and retail prices of inventory purchased as per delivery receipts were in agreement with POS purchase records after acceptance of the inventory;
- (4) We inspected and checked whether the POS records for costs and retail prices of inventory purchased were periodically and completely transferred to the ERP system and that the records could not be changed manually.
- (5) We recalculated the cost-to-retail ratio to verify its accuracy.

Other matter –Reference to the audits of other auditors

We did not audit the financial statements of certain investments accounted for under equity method which were audited by other auditors. Therefore, our opinion expressed herein, insofar as it relates to the amounts included in the financial statements and the information disclosed in Note 13 relative to these investments, is based solely on the reports of the other auditors. The balance of these investments accounted for under equity method amounted to \$4,016,520 thousand and \$4,054,627 thousand, constituting 1.85% and 2.06% of the related totals as of December 31, 2022 and 2021, respectively, and share of profit or loss amounted to (\$20,295) thousand and \$634,785 thousand, constituting (0.08%) and 3.47% of the related totals for the years then ended, respectively.

Responsibilities of management and those charged with governance for the parent company only financial statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee, are responsible for overseeing the Company's financial reporting process.

Auditors' responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial

statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

UNI-PRESIDENT ENTERPRISES CORP.
NOTES TO THE PARENT COMPANY ONLY FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021

(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. HISTORY AND ORGANIZATION

(1) Uni-President Enterprises Corp. (the "Company") was incorporated as a company limited by shares under the provisions of the Company Law of the Republic of China (R.O.C.) in August 1967. The Company is primarily engaged in the manufacture, processing and sales of various soft drinks, foods, animal feeds and flour.

(2) The common shares of the Company have been listed on the Taiwan Stock Exchange since December 1987.

2. THE DATE OF AUTHORIZATION FOR ISSUANCE OF THE PARENT COMPANY ONLY FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORIZATION

These parent company only financial statements were authorized for issuance by the Board of Directors on March 9, 2023.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ("IFRS") came into effect as endorsed by the Financial Supervisory Commission ("FSC")

New standards, interpretations and amendments that endorsed by the FSC and became effective from 2022 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board (“IASB”)
Amendments to IFRS 3, ‘Reference to the conceptual framework’	January 1, 2022
Amendments to IAS 16, ‘Property, plant and equipment: proceeds before intended use’	January 1, 2022
Amendments to IAS 37, ‘Onerous contracts—cost of fulfilling a contract’	January 1, 2022
Annual improvements to IFRS Standards 2018–2020	January 1, 2022

The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Company

New standards, interpretations and amendments endorsed by the FSC effective from 2023 are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IAS 1, 'Disclosure of accounting policies'	January 1, 2023
Amendments to IAS 8, 'Definition of accounting estimates'	January 1, 2023
Amendments to IAS 12, 'Deferred tax related to assets and liabilities arising from a single transaction'	January 1, 2023

The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by IASB
Amendments to IFRS 16, 'Lease liability in a sale and leaseback'	January 1, 2024
IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IFRS 17, 'Insurance contracts'	January 1, 2023
Amendment to IFRS 17, 'Initial application of IFRS 17 and IFRS 9 – comparative information'	January 1, 2023
Amendments to IAS 1, 'Classification of liabilities as current or non-current'	January 1, 2024
Amendments to IAS 1, 'Non-current liabilities with covenants'	January 1, 2024

The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these parent company only financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The parent company only financial statements of the Company have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

(2) Basis of preparation

A. Except for the following items, the parent company only financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
 - (b) Financial assets at fair value through other comprehensive income.
 - (c) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.
- B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations that came into effect as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the parent company only financial statements are disclosed in Note 5, ‘Critical accounting judgements, estimates and key sources of assumption uncertainty’.

(3) Foreign currency translation

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”). The parent company only financial statements are presented in New Taiwan Dollars, which is the Company’s functional and presentation currency.

- A. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.
- B. Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss.
- C. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- D. All foreign exchange gains and losses are presented in the parent company only statement of comprehensive income within “Other gains and losses”.

(4) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets arising from operating activities that are expected to be realized, or are intended to be

- sold or consumed within the normal operating cycle;
 - (b)Assets held mainly for trading purposes;
 - (c)Assets that are expected to be realized within twelve months from the balance sheet date;
 - (d)Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
- (a)Liabilities that are expected to be settled within the normal operating cycle;
 - (b)Liabilities arising mainly from trading activities;
 - (c)Liabilities that are to be settled within twelve months from the balance sheet date;
 - (d)Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(5) Cash equivalents

- A. Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.
- B. Time deposits and commercial papers that meet the definition above and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(6) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial assets at fair value, and recognizes the gain or loss in profit or loss.
- D. The Company recognizes the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.

(7) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Company has made an irrevocable election at initial recognition to recognize changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
 - (a) The objective of the Company's business model is achieved both by collecting contractual cash flows and selling financial assets; and

- (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognized and derecognized using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair value:
 - (a) The changes in fair value of equity investments that were recognized in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognized as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.
 - (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognized in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

(8) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Company a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(9) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortized cost, at each reporting date, the Company recognizes the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognizes the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Company recognizes the impairment provision for lifetime ECLs.

(10) Derecognition of financial assets

The Company derecognizes a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Company has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred and the Company has not retained control of the financial asset.

(11) Leasing arrangements (lessor)

Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.

(12) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the weighted-average method. The cost of finished goods and work in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and the estimated costs necessary to make the sale. If the cost exceeds net realizable value, valuation loss is accrued and recognized in operating costs. If the net realizable value reverses, valuation is eliminated within credit balance and is recognized as deduction of operating costs.

(13) Non-current assets (or disposal groups) held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction rather than through continuing use, and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.

(14) Investments accounted for using equity method / subsidiaries and associates

- A. Subsidiaries are all entities (including structured entities) controlled by the Company. The Company controls an entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
- B. Unrealized gains or losses resulting from inter-company transactions with subsidiaries are eliminated. The accounting policies of the subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
- C. After acquisition of subsidiaries, the Company recognizes proportionately the share of profit and loss and other comprehensive income in the income statement as part of the Company's profit and loss and other comprehensive income, respectively. When the share of loss in a subsidiary equals or exceeds the carrying amount of Company's interest in that subsidiary, the Company continues to recognize its share in the subsidiary's loss proportionately.
- D. As long as the change in shareholding in the subsidiaries does not lead to loss of control (transactions with non-controlling interest), it is to be treated as equity, which are transactions between the owners. The difference between non-controlling equity adjustment amount and the fair value of payment and receipt is to be recognized as equity.
- E. Associates are all entities over which the Company has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly

or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognized at cost.

- F. The Company's share of its associates' post-acquisition profits or losses is recognized in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognized in other comprehensive income. When the Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- G. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Company's ownership percentage of the associate, the Company recognizes all changes in 'capital surplus' in proportion to its ownership.
- H. Unrealized gains on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
- I. In the case that an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company's ownership percentage of the associate but maintains significant influence on the associate, then "Capital surplus" and "Investments accounted for under the equity method" shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Company's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
- J. Upon loss of significant influence over an associate, the Company remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss.
- K. When the Company disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate, are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- L. When the Company disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate

are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss proportionately.

- M. According to Regulations Governing the Preparation of Financial Statements by Securities Issuers, “Profit for the year” and “Total other comprehensive income for the year” reported in the parent company only statement of comprehensive income, shall equal to “Profit for the year” and “Total other comprehensive income” attributable to owners of the parent reported in that entity's consolidated statement of comprehensive income. Total equity reported in the parent company only financial statements shall equal to equity attributable to owners of parent reported in the consolidated financial statements.

(15) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
- B. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Except for land, other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, ‘Accounting Policies, Changes in Accounting Estimates and Errors’, from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Asset	Useful lives
Buildings (including accessory equipments)	5 ~ 55 years
Machinery and utilities equipment	2 ~ 15 years
Transportation equipment	5 years
Leasehold improvements	2 ~ 12 years
Other equipment	2 ~ 35 years

(16) Leasing arrangements (lessee)—right-of-use assets/lease liabilities

- A. Leases are recognized as a right-of-use asset and a corresponding lease liability at the date at

which the leased asset is available for use by the Company. For short-term leases or leases of low-value assets, lease payments are recognized as an expense on a straight-line basis over the lease term.

- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate.

Lease payments are comprised of the following:

- (a) Fixed payments, less any lease incentives receivable;
- (b) Variable lease payments that depend on an index or a rate;
- (c) Amounts expected to be payable by the lessee under residual value guarantees;
- (d) The exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and
- (e) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Company subsequently measures the lease liability at amortized cost using the interest method and recognizes interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognized as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

- C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

- (a) The amount of the initial measurement of lease liability;
- (b) Any lease payments made at or before the commencement date;
- (c) Any initial direct costs incurred by the lessee; and
- (d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognized as an adjustment to the right-of-use asset.

- D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset and remeasure the lease liability to reflect the partial or full termination of the lease, and recognize the difference in profit or loss.

(17) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Except for land, investment property is depreciated on a straight-line basis over its estimated useful life of 10 to 55 years.

(18) Intangible assets

Trademarks and licenses are stated at historical cost. Trademarks and licenses have a finite useful life and are amortized on a straight-line basis over their estimated useful lives of 10 years.

(19) Impairment of non-financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.

(20) Borrowings

- A. Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.
- B. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the drawdown occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a pre-payment for liquidity services and amortized over the period of the facility to which it relates.

(21) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(22) Financial liabilities at fair value through profit or loss

- A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges or financial liabilities at fair value through profit or loss. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:
 - (a) Hybrid (combined) contracts; or
 - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or

- (c)They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
- B. At initial recognition, the Company measures the financial liabilities at fair value. All related transaction costs are recognized in profit or loss. The Company subsequently measures these financial liabilities at fair value with any gain or loss recognized in profit or loss.
- C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognized in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognizing in profit or loss for loan commitments or financial guarantee contracts.

(23) Bonds payable

Ordinary corporate bonds issued by the Company are initially recognized at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortized to profit or loss over the period of bond circulation using the effective interest method as an adjustment to ‘finance costs’.

(24) Derecognition of financial liabilities

Financial liability is derecognized when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(25) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

(26) Non-hedging and embedded derivatives

Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.

(27) Provisions

Provisions (including decommissioning) are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense.

(28) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

B. Pensions

(a)Defined contribution plan

For defined contribution plan, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(b)Defined benefit plan

i.Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds (at the balance sheet date) instead.

ii.Remeasurements arising on defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as retained earnings.

iii.Past service costs are recognized immediately in profit or loss.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisor's remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employees' compensation is distributed by shares, the Company calculates the number of shares based on the closing market price at the previous day of the board meeting resolution.

D. Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of employment as a result from either the Company decision to terminate an employee's

employment before the normal retirement date, or an employee's decision to accept an offer of redundancy benefits in exchange for the termination of employment. The Company recognises expense as it can no longer withdraw an offer of termination benefits or it recognises relating restructuring costs, whichever is earlier. Benefits that are expected to be due more than 12 months after balance sheet date shall be discounted to their present value.

(29) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realized or the deferred tax liability is settled.
- D. Deferred tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on

a net basis or realize the asset and settle the liability simultaneously.

F. A deferred tax asset shall be recognized for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(30) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(31) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(32) Revenue recognition

A. Sales of goods

(a)The Company manufactures and sells various soft drinks, food, animal feeds, sauces, vegetable oil, and medicine, etc. Sales are recognized when control of the products has transferred, being when the products are delivered to the wholesaler, the wholesaler has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the wholesaler's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the wholesaler, and either the wholesaler has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.

(b)Revenue from these sales is recognized based on the price specified in the contract, net of the estimated sales discounts and volume discounts. The products are often sold with volume discounts based on estimated sales of each year. Accumulated experience is used to estimate and provide for the sales discounts and volume discounts, using the expected value method, and revenue is only recognized to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. A refund liability is recognized for expected sales discounts and volume discounts payable to customers in relation to sales made until the end of the reporting period. As the time interval between the transfer of committed goods or service and the payment of customer does not exceed one year, the Company does not adjust the transaction price to reflect the time value of money.

(c)A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Incremental costs of obtaining a contract

Given that the contractual period lasts less than one year, the Company recognizes the incremental costs of obtaining a contract as an expense when incurred although the Company expects to recover those costs.

(33) Business combinations

- A. The Company uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Company measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognized amounts of the acquiree's identifiable net assets.
- B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognized and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognized directly in profit or loss on the acquisition date.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these parent company only financial statements requires management to make critical judgements in applying the Company's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The judgment and assumptions made by the Company in applying its accounting policies and concerning future events do not involve significant risk of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year.

- B. The fair value of the investment property held by the Company as of December 31, 2022 and 2021 ranged from \$13,620,463 to \$20,336,384 which was assessed based on the reports of independent appraisers. Valuations were made based on most recent transaction prices of similar and comparable properties, considering factors such as location, transaction scale, and purpose

- of use, etc., which is categorized within Level 3 in the fair value hierarchy.
- C. The Company purchased agricultural land under the names of individuals for other uses in the future. The decision on the purpose of the land has not yet been decided, however, this was recognized as “Investment property, net”.
- D. In July 2020, the Company entered into a trading contract for the land in Tree Valley Park with Chi Mei Corporation and Himax Technologies, Inc., whereby both parties agreed to authorize the Company to use the land before the transfer of ownership. Because the Company leased the land to the subsidiary, Uni-President Express Corp., the Company recognized the land price as ‘Investment property, right-of-use assets’ in the amount of \$1,895,567, of which the land price of \$750,372 was not paid (listed as “Other payables” and “Long-term notes and accounts payable” for the years ended December 31, 2022 and 2021, respectively). Please refer to Note 7, “RELATED PARTY TRANSACTIONS”, for information on the lease to the subsidiary.

(18) Pensions

A. The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 15% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.

(c) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilization plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund" (Article 6: The scope of utilization for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilization of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. The composition of fair value of plan assets as of December 31, 2022 and 2021 is given in the Annual Labor Retirement Fund Utilization Report published by the government. Expected return on plan assets was a projection of overall return for the obligations period, which was estimated based on historical returns and by reference to the status of Labor Retirement Fund utilization by the Labor Pension Fund Supervisory Committee and taking into account the effect that the Fund's minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2022 and 2021 is given in the Annual Labor Retirement Fund Utilization Report announced by the government.

(d) The principal actuarial assumptions used were as follows:

	For the years ended December 31,	
	2022	2021
Discount rate	1. 25%	0. 57%
Future salary increases	3. 25%	3. 00%

Assumptions regarding future mortality experience are both set based on actuarial advice in accordance with published statistics and experience according to Taiwan Life Insurance Industry 6th Mortality Table for the years ended December 31, 2022 and 2021.

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

	Discount rate	Future salary increases		
	<u>Increase 0.25%</u>	<u>Decrease 0.25%</u>	<u>Increase 0.25%</u>	<u>Decrease 0.25%</u>
<u>December 31, 2022</u>				
Effect on present value of defined benefit obligation	(\$ 189,000)	\$ 195,240	\$ 190,928	(\$ 185,840)
<u>December 31, 2021</u>				
Effect on present value of defined benefit obligation	(\$ 216,301)	\$ 223,831	\$ 217,923	(\$ 211,788)
The sensitivity analysis above was arrived at based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analyzing sensitivity and the method of calculating net pension liability in the balance sheet are the same.				

(e) Expected contributions to the defined benefit pension plan of the Company for the next year will be \$54,542.

(f) As of December 31, 2022, the weighted average duration of the retirement plan is 8 years. The analysis of timing of the future pension payment was as follows:

Within next 1 year	\$ 457,723
Next 2~5 years	2,374,792
Next over 6 years	7,240,667
	<u>\$ 10,073,182</u>

B. Effective July 1, 2005, the Company has established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contributes monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment. The pension costs under the defined contribution pension plan of the Company for the years ended December 31, 2022 and 2021 were \$160,694 and \$156,954, respectively.

(19) Share capital

A. Movements in the number of the Company’s ordinary shares outstanding are as follows (unit: thousand shares):

	For the years ended December 31,	
	2022	2021
Balance as of January 1 and December 31	<u>5,682,015</u>	<u>5,682,015</u>

B. As of December 31, 2022, the Company’s authorized capital was \$60,000,000, and the paid-in capital was \$56,820,154, consisting of 5,682,015 thousand shares of ordinary stock, with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected.

(20) Capital reserves

A. Pursuant to the Company Law, capital reserves arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the Securities and Exchange Law requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. Capital reserves should not be used to cover accumulated deficit unless the legal reserve is insufficient.

B. Movements of the Company's capital reserves for the years ended December 31, 2022 and 2021 are as follows:

	Share premium	Difference between the acquisition or disposal price and carrying amount of subsidiaries	Share of change in net equity of associates and joint ventures accounted for under equity method	Others	Total

- C. Pursuant to the Business Letter No. 10602420200 issued by Ministry of Economic Affairs in September 2017, the Company transferred the dividend of \$8,975 and \$8,258, which were expired and not received by the shareholders, to capital reserve for the years ended December 31, 2022 and 2021, respectively.
- D. For more information regarding changes in the difference between the acquisition or disposal price of carrying amount of subsidiaries, please refer to Note 6(35) ‘Transaction with non-controlling interests’ of the Company and its subsidiaries’ 2022 consolidated financial statements.

(21) Retained earnings

- A. Pursuant to the amended Company Law, the current year’s after-tax earnings should be used initially to cover any accumulated deficit; thereafter 10% of the remaining earnings should be set aside as legal reserve until the balance of legal reserve is equal to that of paid-in capital. The legal reserve shall be exclusively used to cover accumulated deficit, to issue new stocks or distribute cash to shareholders in proportion to their share ownership. The use of legal reserve for the issuance of stocks or cash dividends to shareholders in proportion to their share ownership is permitted provided that the balance of such reserve exceeds 25% of the Company’s paid-in capital.
- B. Since the Company is in a changeable industry environment and the life cycle of the Company is in a stable growth, the appropriation of earnings should consider fund requirements and capital budgets to decide how much earnings will be kept or distributed and how much cash dividends will be distributed. According to the Company's Articles of Incorporation, 10% of the annual net income, after offsetting any loss of prior years and paying all taxes and dues, shall be set aside as legal reserve. The remaining net income and the unappropriated retained earnings from prior years can be distributed in accordance with a resolution passed during a meeting of the Board of Directors and approved at the stockholders' meeting. Of the amount to be distributed by the Company, stockholders' bonuses shall comprise 50% to 100% of the unappropriated retained earnings, and the percentage of cash dividends shall not be less than 30% of dividends distributed.
- C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings. The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently. The Company reversed proportionately the

special reserve previously set aside, due to use or disposal of relevant assets. For the years ended December 31, 2022 and 2021, the aforementioned reversal of special reserve amounted to \$580 and \$1,670, respectively. As of December 31, 2022, the balance of special reserve that was set aside on initial application of IFRSs was \$3,897,522.

 - A. The Company guarantees that President Chain Store Corp. will fulfill all payments or other obligations due under the Contract to Southland Corporation.
 - B. Without the written approval of Southland Corporation in advance, the Company may not sell, transfer, or pledge the ownership or the assets of President Chain Store Corp.
 - C. The Company should maintain no less than 40% ownership of President Chain Store Corp.

10. SIGNIFICANT DISASTER LOSS

None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE:

None.

12. OTHERS

(1) Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders, maintain an optimal capital structure to both reduce the cost of capital and to meet the monetary needs of improving productivity. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

(2) Financial instruments

A. Financial instruments by category

The information on financial instruments by category is provided in Note 6, Financial assets.

B. Financial risk management policies

- (a) The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial position and financial performance.
- (b) Risk management is carried out by a central treasury department (Company treasury) under policies approved by the board of directors. Company treasury identifies, evaluates and hedges financial risks in close cooperation with the Company's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. Because the Company is primarily operating in domestic markets, the foreign exchange risk from different foreign currency fluctuation is limited. The currency used for export trade is priced in US dollars. Any foreign exchange risk arises from the net investments in foreign operations.
- ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Company treasury, such as forward foreign exchange contracts. However, hedge accounting is not applied as transactions did not meet all criteria of hedge accounting.
- iii. The Company has certain investments in foreign operations, whose net assets are exposed to foreign currency translation risk.
- iv. The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

	December 31, 2022		
	Foreign currency amount (in thousands)	Exchange rate	Book value
(foreign currency: functional currency)			
<u>Financial assets</u>			
<u>Monetary items</u>			
USD : NTD	\$ 929	30. 66	\$ 28, 481
<u>Investment accounted for using equity method</u>			
USD : NTD	2, 638, 807	30. 56	80, 651, 467
<u>Financial liabilities</u>			
<u>Monetary items</u>			
USD : NTD	6, 777	30. 76	208, 460
	December 31, 2021		
	Foreign currency amount (in thousands)	Exchange rate	Book value
(foreign currency: functional currency)			
<u>Financial assets</u>			
<u>Monetary items</u>			
USD : NTD	\$ 752	27. 63	\$ 20, 785
<u>Investment accounted for using equity method</u>			
USD : NTD	2, 597, 798	27. 49	71, 418, 486
<u>Financial liabilities</u>			
<u>Monetary items</u>			
USD : NTD	56, 758	27. 73	1, 573, 904
v.	Total exchange loss, including realized and unrealized arising from significant foreign exchange variation on the monetary items held by the Company for the years ended December 31, 2022 and 2021 amounted to (\$116,961) and \$25,082, respectively.		
vi.	The influence due to the fluctuations of the exchange rate between NTD and USD is primarily from cash and cash equivalents, accounts receivable, other receivables, financial assets accounted for under equity method, borrowings, accounts payable, and other payables denominated in USD. As of December 31, 2022 and 2021, if the NTD:USD exchange rate appreciates/ depreciates by 1% with all other factors remaining constant, the Company's post-tax profit for the years ended December 31, 2022 and 2021 would increase/decrease by \$1,440 and \$12,425, respectively.		
<u>Price risk</u>			
i.	The Company's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other		

comprehensive income. To manage its price risk arising from investments in equity securities, the Company diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Company.

- ii. The Company's investments in equity securities comprise securities issued by domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 2% with all other variables held constant, post-tax profit for the years ended December 31, 2022 and 2021 would have increased/decreased by \$1,845 and \$1,840, respectively, as a result of gains/losses on equity securities classified as at fair value through profit or loss. Other components of equity would have increased/decreased by \$44,819 and \$43,044, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Company's interest rate risk arises from short-term borrowings, long-term borrowings and bonds payable. Borrowings issued at variable rates expose the Company to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rate. Borrowings issued at fixed rates expose the Company to fair value interest rate risk.
- ii. During the years ended December 31, 2022 and 2021, the Company's borrowings at variable rate were denominated in NTD and USD. If interest rates on borrowings had been 0.1% higher/lower with all other variables held constant, post-tax profit for the years ended December 31, 2022 and 2021 would have decreased/increased by \$20,207 and \$10,375, respectively, mainly as a result of higher/lower interest expense on floating rate borrowings.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms, and the contract cash flows of debt instruments stated at amortized cost, at fair value through profit or loss and at fair value through other comprehensive income.
- ii. For bank and financial institutions, only those with high credit rating are accepted. According to the Company's credit policy, the Company is responsible for managing and analyzing the credit risk for its new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. The utilization of credit limits is regularly monitored.
- iii. The Company adopts the following assumptions to assess whether there has been a significant increase in credit risk on that instrument since initial recognition:

- (i) If the contract payments were past due over certain number of days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.
- (ii) If any external credit rating agency rates these bonds as investment grade, the credit risk of these financial assets is low. If the credit rating grade of an investment target degrades two scales, there has been a significant increase in credit risk on that instrument since initial recognition.
- iv. The Company adopts management of credit risk, whereby the default occurs when the contract payments are past due over certain number of days.
- v. The Company classifies customer's accounts receivable in accordance with credit rating of customer, collaterals, credit risk on trade, etc. The Company applies the simplified approach using the provision matrix, loss rate methodology to estimate expected credit loss. The Company uses the forecastability of conditions to adjust historical and timely information to assess the default possibility of accounts receivable. Movements in relation to the Company applying the simplified approach to provide loss allowance for notes receivable, accounts receivable and other receivables are as follows:

	For the years ended December 31,	
	2022	2021
January 1	\$ 23,404	\$ 23,404
Expected credit gains	(602)	(634)
Collection of write-offs	602	634
December 31	<u>\$ 23,404</u>	<u>\$ 23,404</u>

(c)Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Company and aggregated by Company treasury. Company treasury monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Company does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities.
- ii. Surplus cash held by the Company treasury over and above the balance required for working capital management are transferred to the Company treasury. Company treasury invests surplus cash in interest bearing current accounts, time deposits, money market deposits and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the abovementioned forecasts. As of December 31, 2022 and 2021, the money market position held by the Company is shown in Note 6 for various financial assets, that are expected to readily generate cash flows for managing liquidity risk.

iii. The table below analyzes the Company's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(3) Fair value information

- A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1:Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Company's investment in listed stocks is included in Level 1.

Level 2:Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Company's investment in forward exchange is included in Level 2.

Level 3:Unobservable inputs for the asset or liability. The fair value of the Company's investment in equity investment without active market is included in Level 3.

- B. Fair value information of investment property at cost is provided in Note 6(11) 'Investment property, net'.
- C. The carrying amounts of financial assets and financial liabilities not measured at fair value including cash and cash equivalents, notes receivable, accounts receivable (including related parties), other receivables (including related parties), guarantee deposits paid, short-term borrowings, short-term notes and bills payable, notes payable, accounts payable (including related parties), other payables (including related parties), corporate bonds payable (including current portion), long-term borrowings, and guarantee deposits received are approximate to their fair values.
- D. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities are as follows:

	December 31, 2022	Level 1	Level 2	Level 3	Total
Assets					
<u>Recurring fair value measurements</u>

	<u><u>\$ </u></u>	<u><u>- </u></u>	<u><u>\$ </u></u>	<u><u> </u></u>
	<u><u> </u></u>	<u><u> </u></u>	<u><u> </u></u>	<u><u> </u></u>
	<u><u> </u></u>	<u><u> </u></u>	<u><u> </u></u>	<u><u> </u></u>

E. The methods and assumptions the Company used to measure fair value are as follows:

- (a) The instruments that the Company used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	<u>Listed shares</u>
Market quoted price	Closing Price
(b) Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.	
(c) Forward foreign exchange contracts are usually valued based on the current forward exchange rate.	
(d) The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Company's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Company's management policies and relevant control procedures relating to the valuation	

models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.

- (e) The Company takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Company's credit quality.

F. For the years ended December 31, 2022 and 2021, there was no transfer between Level 1 and Level 2.

G. The following chart is the movement of level 3 for the years ended December 31, 2022 and 2021:

Equity securities	For the years ended December 31,	
	2022	2021
January 1	\$ 342, 024	\$ 328, 873
Gain recognized in profit or loss (Note)	212	13, 151
December 31	<u>\$ 342, 236</u>	<u>\$ 342, 024</u>

(Note) Part of the level 3 equity securities has not been adjusted because the difference between the fair value and the carrying amount is immaterial.

H. Financial planning division is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the source of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.

I. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair Value		Significant unobservable input	Relationship of inputs to fair value
	December 31, 2022	December 31, 2021		
Non-derivative equity instrument:			Net asset value	Not applicable
Unlisted shares	<u>\$ 342, 236</u>	<u>\$ 342, 024</u>		Not applicable

J. The Company has carefully assessed the valuation models and assumptions used to measure fair value; therefore, the fair value measurement is reasonable. However, use of different valuation models or assumptions may result in different measurement. The following is the effect on profit or loss or on other comprehensive income of financial assets and liabilities categorized within Level 3 if the inputs used to valuation models have changed:

For the year ended December 31, 2022					
			Recognized in profit or loss	Recognized in other comprehensive income	
	Input	Change	Favourable change	Unfavourable change	Favourable change
Financial assets					
Equity instrument	Net asset value	-	Not applicable		Not applicable

(Note 1) Intercompany transactions between the parent company and its subsidiaries or between subsidiaries are not disclosed repetitively since the circumstances and amounts of each transaction is the same on each side.

In addition, the disclosure threshold for significant intercompany transactions is \$100 million.

(Note 2) The information of transactions between the Company and the consolidated subsidiaries should be noted in column "Number." The number means:

1. The number 0 represents the Company.
2. The consolidated subsidiaries are numbered in order from number 1.

(Note 3) The relationship between transaction company and counterparty is classified into one of the following three categories:

1. The Company to the consolidated subsidiary.

2. The consolidated subsidiary to the Company.

3. The consolidated subsidiary to another consolidated subsidiary.

(Note 4) In calculating the percentage, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenue for income statement accounts.
