CONSOLIDATED FINANCIAL STATEMENTS AND
REPORT OF INDEPENDENT ACCOUNTANTS
DECEMBER 31, 2014 AND 2013

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

To the Board of Directors and Stockholders of Uni-President Enterprises Corp.

We have audited the accompanying consolidated balance sheets of Uni-President Enterprises Corp. and its subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of certain consolidated subsidiaries, which statements reflect total assets of \$8,766,793 thousand and \$6,263,277 thousand, constituting 2% of the related consolidated totals as of December 31, 2014 and 2013, and total operating revenues of \$17,722,760 thousand and \$14,149,319 thousand, constituting 4% and 3% of the related consolidated totals for the years then ended, respectively. In addition, we also did not audit the financial statements of certain investee companies accounted for under the equity method. Investments in these companies amounted to \$11,058,238 thousand and \$11,200,671 thousand as of December 31, 2014 and 2013, respectively, and their related share of profit of associates and joint ventures accounted for under the equity method amounted to \$887,994 thousand and \$801,244 thousand for the years then ended, respectively. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the financial statements and the information disclosed in Note 13 relative to these investments, is based solely on the audit reports of the other auditors.

We conducted our audits in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants" and generally accepted auditing standards in the Republic of China. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Uni-President Enterprises Corp. and its subsidiaries as of December 31, 2014 and 2013, and their financial performance and cash flows for the years then ended in conformity with the “Rules Governing the Preparations of Financial Statements by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

We have also audited the parent company only financial statements of Uni-President Enterprises Corp. as of and for the years ended December 31, 2014 and 2013, and have expressed a modified unqualified opinion on those financial statements.

UNI-PRESIDENT ENTERPRISES CORP. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2014 AND 2013

(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. HISTORY AND ORGANIZATION

(1) Uni-President Enterprises Corp. (the "Company") was incorporated as a company limited by shares under the provisions of the Company Law of the Republic of China (R.O.C.) in August 1967. The Company is primarily engaged in the manufacture, processing and sales of various soft drinks, food, animal feeds and flour. For more information regarding the manufacturing and trading activities the Company and its subsidiaries (the "Group") are engaged in, please refer to Note 4(3).

(2) The common shares of the Company have been listed on the Taiwan Stock Exchange since December 1987.

2. THE DATE OF AUTHORIZATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORIZATION

These consolidated financial statements were authorized for issuance by the Board of Directors on March 26, 2015.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ("IFRS") as endorsed by the Financial Supervisory Commission ("FSC")

None.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

According to Financial-Supervisory-Securities-Auditing No. 1030010325 issued on April 3, 2014, commencing 2015, companies with shares listed on the TWSE or traded on the Taipei Exchange or Emerging Stock Market shall adopt the 2013 version of IFRS (not including IFRS 9, 'Financial instruments') as endorsed by the FSC and the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" effective January 1, 2015 (collectively referred herein as the "2013 version of IFRSs") in preparing the consolidated financial statements. The related new standards, interpretations and amendments are listed below:

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Limited exemption from comparative IFRS 7 disclosures for first-time adopters (amendment to IFRS 1)	July 1, 2010
Severe hyperinflation and removal of fixed dates for first-time adopters (amendment to IFRS 1)	July 1, 2011

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Government loans (amendment to IFRS 1)	January 1, 2013
Disclosures – Transfers of financial assets (amendment to IFRS 7)	July 1, 2011
Disclosures – Offsetting financial assets and financial liabilities (amendment to IFRS 7)	January 1, 2013
IFRS 10, ‘Consolidated financial statements’	January 1, 2013 (Investment entities: January 1, 2014)
IFRS 11, ‘Joint arrangements’	January 1, 2013
IFRS 12, ‘Disclosure of interests in other entities’	January 1, 2013
IFRS 13, ‘Fair value measurement’	January 1, 2013
Presentation of items of other comprehensive income (amendment to IAS 1)	July 1, 2012
Deferred tax: recovery of underlying assets (amendment to IAS 12)	January 1, 2012
IAS 19 (revised), ‘Employee benefits’	January 1, 2013
IAS 27, ‘Separate financial statements’ (as amended in 2011)	January 1, 2013
IAS 28, ‘Investments in associates and joint ventures’ (as amended in 2011)	January 1, 2013
Offsetting financial assets and financial liabilities (amendment to IAS 32)	January 1, 2014
IFRIC 20, ‘Stripping costs in the production phase of a surface mine’	January 1, 2013
Improvements to IFRSs 2010	January 1, 2011
Improvements to IFRSs 2009 – 2011	January 1, 2013

Based on the Group’s assessment, the adoption of the 2013 version of IFRS has no significant impact on the consolidated financial statements of the Group, except the following:

A.IAS 19 (revised), ‘Employee benefits’

Past service cost will be recognised immediately in the period incurred. Net interest expense or income, calculated by applying the discount rate to the net defined benefit asset or liability, replace the finance charge and expected return on plan assets. Additional disclosures are required to present how defined benefit plans may affect the amount, timing and uncertainty of the entity’s future cash flows.

B.IFRS 11, ‘Joint arrangements’

The standard replaces IAS 31, ‘Interests in joint ventures’ and eliminates the policy choice of proportionate consolidation for joint ventures. When deciding the types of joint arrangements – joint operations or joint ventures, the entity should assess the contractual rights and obligations instead of the legal form only.

Based on the Group’s assessment, the adoption of the standard requires the Group to account for their interest in a joint venture using the equity method instead of using proportionate consolidation method. The Group expected to adjust the carrying amounts of assets and liabilities

previously recognized using proportionate consolidation method as follows:

	December 31, 2014	January 1, 2014
<u>Consolidated balance sheet affected items</u>		
Cash and cash equivalents	(\$ 918,832)	(\$ 772,724)
Property, plant and equipment	(\$ 827,030)	(\$ 623,226)
Liabilities	(\$ 1,982,859)	(\$ 1,560,100)
Investments accounted for under equity method	<u>\$ 1,652,142</u>	<u>\$ 1,236,888</u>
For the year ended December 31, 2014		
<u>Consolidated statement of comprehensive income affected items</u>		
Operating revenue	(\$ 7,523,044)	
Operating costs	(\$ 2,603,340)	
Operating expenses	(\$ 3,949,480)	
Non-operating income and expenses	(\$ 245,414)	
Share of profit of associates and joint ventures accounted for under the equity method	<u>\$ 724,810</u>	

C.IAS 1, 'Presentation of financial statements'

The amendment requires entities to separate items presented in OCI classified by nature into two groups on the basis of whether they are potentially reclassifiable to profit or loss subsequently when specific conditions are met. If the items are presented before tax then the tax related to each of the two groups of OCI items (those that might be reclassified and those that will not be reclassified) must be shown separately. Accordingly, the Group will adjust its presentation of the statement of comprehensive income.

D.IFRS 12, 'Disclosure of interests in other entities'

The standard integrates the disclosure requirements for subsidiaries, joint arrangements, associates and unconsolidated structured entities. The Group will disclose additional information about its interests in consolidated entities and unconsolidated entities accordingly.

E.IFRS 13, 'Fair value measurement'

The standard defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The standard sets out a framework for measuring fair value using the assumptions that market participants would use when pricing the asset or liability; for non-financial assets, fair value is determined based on the highest and best use of the asset. Also, the standard requires disclosures about fair value measurements. Based on the Group's assessment, the adoption of the standard has no significant impact on its consolidated financial statements, and the Group will disclose additional information about fair value measurements accordingly.

F.IAS 28, 'Investments in associates and joint ventures'

As consequential amendments resulting from the issuance of IFRS 11, 'Joint arrangements', IAS 28 (revised) sets out the requirements for the application of the equity method when accounting for investments in joint ventures. A portion of an investment in an associate or a joint venture that meets the criteria to be classified as held for sale shall be measured at fair value less costs to sell. Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale shall be accounted for using the equity method until disposal of the portion that is classified as held for sale takes place. When an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the 2013 version of IFRS as endorsed by the FSC:

Novation of derivatives and continuation of hedge accounting (amendments to IAS 39)	January 1, 2014
IFRIC 21, 'Levies'	January 1, 2014

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Improvements to IFRSs 2010-2012	July 1, 2014
Improvements to IFRSs 2011-2013	July 1, 2014
Improvements to IFRSs 2012-2014	January 1, 2016

The Group is assessing the potential impact of the new standards, interpretations and amendments above. The impact on the consolidated financial statements will be disclosed when the assessment is complete.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”).

(2) Basis of preparation

A.Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

- (a)Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
- (b)Available-for-sale financial assets measured at fair value.
- (c)Defined benefit liabilities recognized based on the net amount of pension fund assets plus unrecognized past service cost and less present value of defined benefit obligation.

B.The preparation of financial statements in compliance with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A.Basis for preparation of consolidated financial statements:

- (a)All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies. In general, control is presumed to exist when the parent owns, directly or indirectly through subsidiaries, more than half of the voting power of

an entity. The existence and effect of potential voting rights that are currently exercisable or convertible have been considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

- (b) Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
- (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.
- (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss. All amounts previously recognized in other comprehensive income in relation to the subsidiary are reclassified to profit or loss, on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognized in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

(Note 1) Jointly owned by the Group.

(Note 2) The percentage owned by the Group as of December 31, 2014 and 2013 were between 36% and 100% and between 30% and 100%, respectively.

(Note 3) Liquidated or sold in the current period.

(Note 4) Newly established company.

(Note 5) In accordance with IAS 31, "Accounting for Joint Ventures", the proportionate consolidation method is adopted to account for its share of the respective accounts of certain investees' assets, liabilities, revenues, and expenses in the consolidated financial statements.

(Note 6) After a comprehensive evaluation, the Group has the power to govern the financial and operating policies of the investee companies and hence they are included in the consolidated financial statements.

C.Subsidiaries not included in the consolidated financial statements: None.

D.Adjustments for subsidiaries with different balance sheet dates: None.

E.Nature and extent of the restrictions on fund remittance from subsidiaries to the parent company:
None.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.

A.Foreign currency transactions and balances

(a)Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.

(b)Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss.

(c)Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

(d)All foreign exchange gains and losses based on the nature of those transactions are presented in the statement of comprehensive income within 'other gains and losses'.

B.Translation of foreign operations

- (a)The operating results and financial position of all the group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognized in other comprehensive income.
- (b)When a foreign operation as an associate or jointly controlled entity is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group retains partial interest in the former foreign associate or jointly controlled entity after losing significant influence over the former foreign associate, or losing joint control of the former jointly controlled entity, such transactions should be accounted for as disposal of all interest in these foreign operations.
- (c)When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, if the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

- A.Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a)Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;
 - (b)Assets held mainly for trading purposes;
 - (c)Assets that are expected to be realized within twelve months from the balance sheet date;
 - (d)Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.

- B.Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

- (a)Liabilities that are expected to be paid off within the normal operating cycle;
 - (b)Liabilities arising mainly from trading activities;
 - (c)Liabilities that are to be paid off within twelve months from the balance sheet date;
 - (d)Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the

counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

- A.Cash equivalents refer to short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.
- B.Time deposits that meet the definition above and are held for the purpose of meeting short-term cash commitments in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A.Financial assets at fair value through profit or loss are financial assets held for trading or financial assets designated as at fair value through profit or loss on initial recognition. Financial assets are classified in this category if held for trading if acquired principally for the purpose of selling in the short-term. Derivatives are also categorized as financial assets held for trading unless they are designated as hedges. Financial assets that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:
 - (a)Hybrid (combined) contracts; or
 - (b)They eliminate or significantly reduce a measurement or recognition inconsistency; or
 - (c)They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.

- B.On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.

- C.Financial assets at fair value through profit or loss are initially recognized at fair value. Related transaction costs are expensed in profit or loss. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognized in profit or loss.

(8) Available-for-sale financial assets

- A.Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories.
- B.On a regular way purchase or sale basis, available-for-sale financial assets are recognized and derecognized using trade date accounting.
- C.Available-for-sale financial assets are initially recognized at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognized in other comprehensive income. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in ‘financial assets measured at cost’.

(9) Loans and receivables

A. Accounts receivable

Accounts receivable are loans and receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. Accounts receivable are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. However, short-term accounts receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

B. Bond investments without active market

(a) Bond investments without active market are loans and receivables not originated by the entity.

They are bond investments with fixed or determinable payments that are not quoted in an active market, and also meet all of the following conditions:

- i. Not designated on initial recognition as at fair value through profit or loss;
- ii. Not designated on initial recognition as available-for-sale;
- iii. Not for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

(b) On a regular way purchase or sale basis, bond investments without active market are recognized and derecognized using trade date accounting.

(c) Bond investments without active market are initially recognized at fair value on the trade date plus transaction costs and subsequently measured at amortized cost using the effective interest method, less provision for impairment. Amortization of a premium or a discount on such assets is recognized in profit or loss.

(10) Impairment of financial assets

A. The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (a ‘loss event’) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

B. The criteria that the Group uses to determine whether there is objective evidence of an impairment loss is as follows:

- (a) Significant financial difficulty of the issuer or debtor;
- (b) The disappearance of an active market for that financial asset because of financial difficulties;
- (c) Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;

- (d)Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered;
- (e)A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.
- C.When the Group assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:
- (a)Financial assets measured at amortized cost
- The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognized in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortized cost that would have been at the date of reversal had the impairment loss not been recognized previously. Impairment loss is recognized and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.
- (b)Financial assets measured at cost
- The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at current market return rate of similar financial asset, and is recognized in profit or loss. Impairment loss recognized for this category shall not be reversed subsequently. Impairment loss is recognized by adjusting the carrying amount of the asset through the use of an impairment allowance account.
- (c)Available-for-sale financial assets
- The amount of the impairment loss is measured as the difference between the asset's acquisition cost (less any principal repayment and amortization) and current fair value, less any impairment loss on that financial asset previously recognized in profit or loss, and is reclassified from 'other comprehensive income' to 'profit or loss'. If, in a subsequent period, the fair value of an investment in a debt instrument increases, and the increase can be related objectively to an event occurring after the impairment loss was recognized, then such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognized in profit or loss shall not be reversed through profit or loss. Impairment loss is recognized and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(11) Derecognition of financial assets

The Group derecognizes a financial asset when one of the following conditions is met:

- A. The contractual rights to receive cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows from the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows from the financial asset have been transferred, and the Group has not retained control of the financial asset.

(12) Leases

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.
- B. An operating lease is a lease other than a finance lease. Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.
- C. The maintenance expenses for leased items are listed as operating cost in the current period. However, when the lease items become purchasable, the book value of these items are listed as "Inventories". Under IAS 18, 'Income,' the revenues generated from the sales of these items are listed as income.

(13) Inventories

A. **The Company**

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the weighted-average method. The cost of finished goods and work in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

B. **Subsidiaries**

Except for President Chain Store Corp. and its subsidiaries, Philippine Seven Corporation, President Drugstore Business Corp., and Uni-President Oven Bakery Corp., which adopt the retail method and Tone Sang Construction Corp. which adopts construction accounting, the subsidiaries adopt the same accounting principle for inventories as the Company.

(14) Non-current assets (or disposal groups) held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction rather than through continuing use, and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.

(15) Investments accounted for using equity method / associates

- A. Associates are all entities over which the Group has significant influence but not control. In

general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognized at cost.

- B.The Group's share of its associates' post-acquisition profits or losses is recognized in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognized in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C.When changes in an associate's equity are not recognized in profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognizes the Group's share of change in equity of the associate in 'capital reserves' in proportion to its ownership.
- D.Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- E.In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
- F.Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss.
- G.When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss or transferred directly to retained earnings, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it still retains significant influence over this associate, then the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- H.When the Group disposes its investment in an associate and loses significant influence over this

associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss. If it still retains significant influence over this associate, then the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Joint ventures—Jointly controlled entities

The Group accounts for its interest in jointly controlled entities by proportionately consolidating its share of jointly controlled entities' assets, liabilities, income and expenses with the similar items, line by line, in the consolidated financial statements. Unrealized profits and losses arising from the transactions between the Group and its joint venture are eliminated to the extent of the Group's interest in the joint venture. However, when the transaction provides evidence of a reduction in the net realizable value of current assets or an impairment loss, all such losses shall be recognized immediately.

(17) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
- B. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Except for land, other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each component of property, plant and equipment is significant, it is depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Asset	Useful lives
Buildings	2 ~ 55 years
Machinery and utilities equipment	2 ~ 30 years
Transportation equipment	2 ~ 20 years
Leasehold improvements	2 ~ 28 years
Other equipment	1 ~ 40 years

(18) Leased assets/ leases (lessee)

A.Based on the terms of a lease contract, a lease is classified as a finance lease if the Group assumes substantially all the risks and rewards incidental to ownership of the leased asset.

(a)A finance lease is recognized as an asset and a liability at the lease's commencement at the lower of the fair value of the leased asset or the present value of the minimum lease payments.

(b)The minimum lease payments are apportioned between the finance charges and the reduction of the outstanding liability. The finance charges are allocated to each period over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

(c)Property, plant and equipment held under finance leases are depreciated over their estimated useful lives. If there is no reasonable certainty that the Group will obtain ownership at the end of the lease, the asset shall be depreciated over the shorter of the lease term and its useful life.

B.An operating lease is a lease other than a finance lease. Payments made under an operating lease (net of any incentives received from the lessor) are recognized in profit or loss on a straight-line basis over the lease term.

(19) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Except for land, investment property is depreciated on a straight-line basis over its estimated useful life of 15~50 years.

(20) Intangible assets

A.Trademarks and licenses

Separately acquired trademarks and licenses are stated at historical cost. Trademarks and licenses acquired in a business combination are recognized at fair value at the acquisition date. Trademarks and licenses have a finite useful life and are amortized on a straight-line basis over their estimated useful lives of 15~20 years.

B.Computer software

Computer software is stated at cost and amortized on a straight-line basis over its estimated useful life of 3~5 years.

C.Right of operation

Under IFRIC 12, "Service Concession Agreement," the Group has entered into a contract with the government whereby the Group shall provide infrastructure for public transportation services. Based on the contract, the government grants the Group the right to operate and provide transportation services to the public. Such right is measured using the fair value of the infrastructure, recognized as an intangible asset, and amortized over the contract period of 50 years.

(21) Impairment of non-financial assets

- A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. When the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.
- B. The recoverable amounts of intangible assets with an indefinite useful life and intangible assets that have not yet been available for use shall be evaluated periodically. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognized in profit or loss shall not be reversed in the following years.

(22) Borrowings

- A. Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.
- B. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a pre-payment for liquidity services and amortized over the period of the facility to which it relates.

(23) Notes and accounts payable

Accounts payable are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. They are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. However, for short-term accounts payable without bearing interest, as the effect of discounting is insignificant, they are measured subsequently at original invoice amount.

(24) Financial liabilities at fair value through profit or loss

- A. Financial liabilities at fair value through profit or loss are financial liabilities held for trading or financial liabilities designated as at fair value through profit or loss on initial recognition. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:

- (a) Hybrid (combined) contracts; or
- (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
- (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.

B. Financial liabilities at fair value through profit or loss are initially recognized at fair value. Related transaction costs are expensed in profit or loss. These financial liabilities are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial liabilities are recognized in profit or loss.

(25) Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(26) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

(27) Financial liabilities and equity instruments

Ordinary corporate bonds issued by the Group are initially recognized at fair value, net of transaction costs incurred. Ordinary corporate bonds are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is accounted for as the premium or discount on bonds payable and presented as an addition to or deduction from bonds payable, which is amortized in profit or loss as an adjustment to the ‘finance costs’ over the period of bond circulation using the effective interest method.

(28) Derivative financial instruments

Derivatives are initially recognized at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Any changes in the fair value are recognized in profit or loss. Derivatives that are linked to unquoted equity instruments without reliably measured fair value and must be settled by delivery of such unquoted equity instruments are presented in ‘financial assets or financial liabilities measured at cost’.

(29) Provisions

Provisions (including decommissioning) are recognized when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.

(30) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expenses in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the Group pays fixed contributions to an independent, publicly or privately administered pension fund. The Group has no further legal or constructive obligations once the contributions have been paid. The contributions are recognized as pension expenses when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognized past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in such corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.
- ii. Actuarial gains and losses arising on defined benefit plans are recognized in other comprehensive income in the period in which they arise, and presented in retained earnings.
- iii. Past service costs are recognized immediately in profit or loss if vested immediately; if not, the past service costs are amortized on a straight-line basis over the vesting period.

C. Employees' bonus and directors' and supervisors' remuneration

Employees' bonus and directors' and supervisors' remuneration are recognized as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. However, if the accrued amounts for employees' bonus and directors' and supervisors' remuneration are different from the actual distributed amounts as resolved by the stockholders at their stockholders' meeting subsequently, the differences should be recognized based on the accounting for changes in estimates. The Group calculates the number of shares of employees' stock bonus based on the fair value per share at the previous day of the stockholders' meeting held in the year following the financial reporting year, after

taking into account the effects of ex-rights and ex-dividends.

(31) Income tax

- A.The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
- B.The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C.Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.
- D.Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.
- E.Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.
- F.A deferred tax asset shall be recognized for unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures, employees' training costs and equity investments to the extent that it is possible that future taxable profit will be available

against which the unused tax credits can be utilized.

(32) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares and share premium on the effective date of new shares issuance.

(33) Revenue recognition

A. Sales of goods

(a) The Group manufactures and sells various soft drinks, food, animal feeds, sauces, vegetable oil, and medicine, etc. Revenue is measured at the fair value of the consideration received or receivable taking into account the value-added tax, returns, rebates and discounts for the sale of goods to external customers in the ordinary course of the Group's activities. Revenue arising from the sales of goods should be recognized when the Group has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards of ownership have been transferred to the customer, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

(b) The Group offers customers volume discounts and right of return for defective products. The Group estimates such discounts and returns based on historical experience. Provisions for such liabilities are recorded when the sales are recognized. The volume discounts are estimated based on the anticipated annual sales quantities.

(c) The Group has customer loyalty programmes where the Group grants loyalty award credits (such as 'points'; the award credits can be used to exchange for free or discounted goods) to customers as part of a sales transaction. The fair value of the consideration received or receivable in respect of the initial sale shall be allocated between the initial sale of goods and the award credits. The amount of proceeds allocated to the award credits is measured by reference to the fair value of goods that can be redeemed by using the award credits and the proportion of award credits that are expected to be redeemed by customers. The Group recognizes the deferred portion of the proceeds allocated to the award credits as revenue only when it has fulfilled its obligations in respect of the award credits.

B. Sales of services

The Group provides services such as the operation of public transportation station, processing of packaging materials, establishing information system and management consulting, etc. Revenue from rendering services is recognized under the percentage-of-completion method

when the outcome of services provided can be estimated reliably. The stage of completion of a service contract is measured by the percentage of the actual services performed as of the financial reporting date to the total services to be performed by surveys of work performed. If the outcome of a service contract cannot be estimated reliably, contract revenue should be recognized only to the extent that contract costs incurred are likely to be recoverable.

C.A sale agreement comprising of multiple components

A sale agreement offered by the Group might comprise of multiple components, including sale of goods and subsequent repair services, etc. If a sale agreement comprises of multiple identifiable components, the fair value of the consideration received or receivable in respect of the sale agreement shall be allocated between those components based on the relative fair value of each component. The amount of proceeds allocated to each component is recognized as revenue in profit or loss following the revenue recognition criteria applied to each component.

The fair value of each component is determined by its market value when it is sold separately.

(34) Service concession arrangements

A.The Group contracted with the government (grantor) a service concession arrangement whereby the Group shall provide construction of the government's infrastructure assets for public services and operate those assets during the term of the arrangement. When the term of the operating period expires, the underlying infrastructure assets will be transferred to the government without consideration. The Group allocates the fair value of the consideration received or receivable in respect of the service concession arrangement between construction services and operating services provided based on their relative fair values, and recognizes such allocated amounts as revenues in accordance with IAS 11, 'Construction Contracts', and IAS 18, 'Revenue', respectively.

B.Costs incurred on provision of construction services or upgrading services under a service concession arrangement are accounted for in accordance with IAS 11, 'Construction Contracts'.

C.The consideration received or receivable from the grantor in respect of the service concession arrangement is recognized at its fair value. Such considerations are recognized as a financial asset or an intangible asset based on how the considerations from the grantor to the operator are made as specified in the arrangement. The Group recognizes a financial asset to the extent that it has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services, and recognizes an intangible asset to the extent that it receives a right (a license) to charge users of the public service.

(35) Government grants

Government grants are recognized at their fair value only when there is reasonable assurance that the Group will comply with any conditions attached to the grants and the grants will be received. Government grants are recognized in profit or loss on a systematic basis over the periods in which the Group recognizes expenses for the related costs for which the grants are intended to compensate.

(36) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chairman that makes strategic decisions.

5. Critical accounting judgments, estimates and key sources of assumption uncertainty

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

A. Financial assets - impairment of equity investments

The Group follows the guidance of IAS 39 to determine whether a financial asset - equity investment is impaired. This determination requires significant judgment. In making this judgment, the Group evaluates, among other factors, the duration and extent to which the fair value of an equity investment is less than its cost and the financial health of and short-term business outlook for the investee, including factors such as industry and sector performance, changes in technology and operational and financing cash flow.

B. Investment property

The Group uses part of the property for its own use and part to earn rentals or for capital appreciation. When the portions cannot be sold separately and cannot be leased out separately under finance lease, the property is classified as investment property only if the own-use portion accounts for less than 10% of the property.

C. Revenue recognition on a net/gross basis

The determination of whether the Group is acting as principal or agent in a transaction is based on an evaluation of Group's exposure to the significant risks and rewards associated with the sale of goods or the rendering of service in accordance with the business model and substance of the transaction. Where the Group acts as a principal, the amount received or receivable from customer is recognized as revenue on a gross basis. Where the Group acts as an agent, net revenue is recognized representing commissions earned.

The following characteristics of a principal are used as indicators to determine whether the Group shall recognize revenue on a gross basis:

- (a) The Group has primary responsibilities for the goods or services it provides;
- (b) The Group bears inventory risk;
- (c) The Group has the latitude in establishing prices for the goods or services, either directly or

indirectly.

(d)The Group bears credit risk of customers.

(2) Critical accounting estimates and assumptions

A.Evaluation of inventories

As inventories are stated at the lower of cost and net realizable value, the Group must determine the net realizable value of inventories on balance sheet date using judgments and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

Please refer to Note 6(6) for more information regarding the carrying amount of inventories as of December 31, 2014.

B.Impairment assessment of financial assets without active markets

When there is an impairment indication that a financial instrument is impaired and the carrying amount of such investment may not be recoverable, the Group would assess the impairment loss of the investment accordingly. For a financial asset without an active market, the Group assesses its impairment based on the present value of estimated future cash flows from the expected cash dividends and disposal value discounted using the market rate of return at the balance sheet date for a similar financial instrument to determine its recoverable amount as well as by analysing the reasonableness of the related assumptions used.

For more information regarding the carrying amount of financial assets measured at cost after the impairment loss as of December 31, 2014, please refer to Notes 6(9) and 6(10).

C.Impairment assessment of investments accounted for using equity method

The Group assesses the impairment of an investment accounted for using equity method as soon as there is any indication that it might have been impaired and its carrying amount is not recoverable. The Group assesses the recoverable amounts of an investment accounted for under the equity method based on the present value of expected cash dividends receivable from the investee and expected future cash flows from the disposal of the investee, and analyzes the reasonableness of related assumptions.

For more information regarding the Group's investments accounted for under the equity method, net of impairment loss, as of December 31, 2014, please refer to Note 6(11).

D.Impairment assessment of tangible and intangible assets

The Group assesses impairment based on its subjective judgement and determines the separate cash flows of a specific group of assets, useful lives of assets and the future possible income and expenses arising from the assets depending on how assets are utilized and industrial characteristics. Any changes of economic circumstances or estimates due to the change of Group strategy might cause material impairment on assets in the future.

For more information regarding the Group's recognized equipment, net of impairment loss, as of December 31, 2014, please refer to Notes 6(12) and 6(13).

E. Realisability of deferred income tax assets

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilised. Assessment of the realisability of deferred income tax assets involves critical accounting judgments and estimates of the management, including the assumptions of expected future sales revenue growth rate and profit rate, tax exempt duration, available tax credits, tax planning, etc. Any variations in global economic environment, industrial environment, and laws and regulations might cause material adjustments to deferred income tax assets.

For more information regarding the Group's recognized deferred income tax assets as of December 31, 2014, please refer to Note 6(32).

F. Calculation of accrued pension obligations

When calculating the present value of defined pension obligations, the Group must apply judgments and estimates to determine the actuarial assumptions on balance sheet date, including discount rates and expected rate of return on plan assets. Any changes in these assumptions could significantly impact the carrying amount of defined pension obligations.

For more information regarding the Group's accrued pension liabilities as of December 31, 2014, please refer to Note 6(21).

(7) Non-current assets held for sale, net

The Group has been approved by the board of directors to sell all the shares of Chengdu Ton Yi Industrial Packing Co., Ltd. and Muji Taiwan Co., Ltd. in October 2013 and December 2013, respectively. The corresponding assets and liabilities have been transferred to assets held for sale. The transaction pertaining to Muji Taiwan Co., Ltd. had been settled on January 6, 2014, with a consideration of \$1,445,650 and gain on disposal of \$1,118,398 (listed as “Other gains and losses”).

This transaction resulted in a decrease in non-controlling interest of \$429,348. The sales transaction pertaining to Chengdu Ton Yi Industrial Packing Co., Ltd. was expected to be completed in June 2014, however, it was still under administration process and is subject to approval from local government. As a result, both parties to the transaction agreed to sign a supplemental agreement on June 30, 2014, whereby both parties agreed to waive the restriction on the date the transaction should be completed as stated in the original agreement. If the transaction is not approved by the local government, the original share transfer agreement and the supplemental agreement are deemed terminated. Due to restriction policies of the local government, the approval of transfer was not obtained and consequently, the agreement was automatically terminated in December 2014.

The Group then entered into a land expropriation and compensation on plan facilities decommissioning agreement (the ‘Compensation Agreement’) with the Xindu District Government of Chengdu City, whereby both parties agreed that the decommissioning of plant facilities and building should be completed and the title of the land should be transferred within 120 days after the effective date of the agreement. Assets and liabilities that were not in the scope of the Compensation Agreement were transferred out from assets held for sale, net.

Detailed information on non-current assets held for sale, net as at December 31, 2014 and 2013 is as follows:

(24) Retained earnings

A.Pursuant to the amended R.O.C. Company Law, the current year's after-tax earnings should be used initially to cover any accumulated deficit; thereafter 10% of the remaining earnings should be set aside as legal reserve until the balance of legal reserve is equal to that of paid-in capital. The legal reserve shall be exclusively used to cover accumulated deficit, to issue new stocks or distribute cash to shareholders in proportion to their share ownership. The use of legal reserve for the issuance of stocks or cash dividends to shareholders in proportion to their share ownership is permitted provided that the balance of such reserve exceeds 25% of the Company's paid-in capital.

B.Since the Company is in a changeable industry environment and the life cycle of the Company is in a stable growth, the appropriation of earnings should consider fund requirements and capital budgets to decide how much earnings will be kept or distributed and how much cash dividends will be distributed. According to the Company's Articles of Incorporation, 10% of the annual net income, after offsetting any loss of prior years and paying all taxes and dues, shall be set aside as legal reserve. The remaining net income and the unappropriated retained earnings from prior years can be distributed in accordance with a resolution passed during a

meeting of the Board of Directors and approved at the stockholders' meeting. Of the amount to be distributed by the Company, stockholders' bonuses shall comprise 50% to 100% of the unappropriated retained earnings, and the percentage of cash dividends shall not be less than 30% of dividends distributed. Directors' and supervisors' remuneration shall comprise 2% and at least 0.2% for employees' bonuses.

- C.In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings. The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently. The Company reversed proportionately the special reserve previously set aside, due to use of relevant assets, amounting to \$619 for the years ended December 31, 2014 and 2013.
- D.For the years ended December 31, 2014 and 2013, employees' bonus and directors' and supervisors' remuneration were accrued at \$1,165,759 and \$1,292,985, respectively, which were based on the after tax earnings of related periods, considering legal reserve calculated by the percentage prescribed under the Company's Articles of Incorporation. The actual amount approved at the shareholders' meeting for employees' bonus and directors' and supervisors' remuneration for 2013 was \$1,296,964, which was different from the estimated amount recognized in the 2013 financial statements by \$3,979. Such difference was recognized in profit and loss for the year ended December 31, 2014. Information about the appropriation of employees' bonus and directors' and supervisors' remuneration by the Company as proposed by the Board of Directors and resolved by the stockholders will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.
- E.The Company recognized dividends distributed to owners amounting to \$9,724,949 (\$1.40 (in dollars) per share as cash dividend and \$0.60 (in dollars) per share as stock dividends) for the year ended December 31, 2013. On June 24, 2014, the stockholders during their meeting resolved total dividends for 2013 of \$10,823,868, constituting \$1.50 (in dollars) per share for cash dividends and \$0.6 (in dollars) per share for stock dividends. On March 26, 2015, the Board of Directors during its meeting proposed total dividends for 2014 of \$9,834,257, constituting \$1.40 (in dollars) per share for cash dividends and \$0.4 (in dollars) per share for stock dividends.
- F. In accordance with relevant laws and regulations of R.O.C., the long-term equity investment accounted for using equity method – President Securities Corp. has set aside a special reserve for trading losses and default losses from the annual post tax profit. The special reserve shall not be used for any other purpose except for covering the losses of President Securities Corp. or, when the special reserve reaches 50% of the amount of paid-in capital, 50% of the special

reserve may be used for capitalization. As of December 31, 2014, the Group recognized special reserve of \$105,429 in accordance with IAS 28, "Investments in Associates and Joint Ventures".

G. The Group sold its investment in Cargill President Holdings Pte. Ltd. in 2013. However, as the Group has elected to reset the cumulative translation difference from foreign operations to zero at the date of transition to IFRSs, it increased its retained earnings and set aside a special reserve on the date of transition. On the date of disposal of the aforementioned investments, the Group reversed proportionately the special reserve of \$72,443 for the year ended December 31, 2013. There was no such item for the year ended December 31, 2014.

Deductible temporary differences	<u>\$ 3,266,515</u>	<u>\$ 3,178,556</u>

G.The Group estimates taxable temporary differences arising from gains on investment in overseas subsidiaries in accordance with tax regulations and IAS 12. As the Group has the ability to control the timing of the reversal of such temporary differences, and considering the

overall operating arrangement, resource allocation and capital reinvestment, the Group believes that such temporary differences will possibly not reverse in the foreseeable future. As a result, it is permissible under IAS 12 that the Group does not recognize related deferred tax arising from taxable temporary differences. As of December 31, 2014 and 2013, the related unrecognized temporary difference were \$49,255,716 and \$42,857,885, respectively, and unrecognized deferred tax liabilities were \$6,391,648 and \$5,584,859, respectively.

H. The Company's income tax returns through 2012 have been assessed and approved by the Tax Authority and there were no disputes existing between the Company and the Authority as of March 26, 2015.

Profit attributable to ordinary shareholders plus assumed conversion of all dilutive potential ordinary shares	\$ 12,764,241	5,486,399	\$ 2.33

- A.The abovementioned weighted average number of ordinary shares outstanding to conversion has been adjusted to unappropriated retained earnings as proportional increase in capital for the year ended December 31, 2013.
- B.As employees' bonus could be distributed in the form of stock, the diluted EPS computation shall include those estimated shares that would increase from employees' stock bonus issuances in the weighted-average number of common shares outstanding during the reporting year, taking into account the dilutive effects of stock bonus on potential common shares; whereas, basic EPS shall be calculated based on the weighted-average number of common shares outstanding during the reporting year that include the shares of employees' stock bonus for the appropriation of prior years' earnings, which have already been resolved at the stockholders' meeting held in the reporting year. Since capitalization of employees' bonus no longer belongs to distribution of stock dividends, the calculation of basic EPS and diluted EPS for all periods presented shall not be adjusted retroactively.

(34) Transactions with non-controlling interest

- A.In 2014, the Group partially disposed its shares of the subsidiary, Ton Yi Industrial Corp., through public market for a total cash consideration of \$4,009. The carrying amount of non-controlling interest was \$3,932 at the disposal date. This transaction resulted in an increase in the non-controlling interest by \$3,932 and an increase in the equity attributable to owners of the parent by \$77.
- B.In 2014, the Group acquired additional shares of its subsidiaries, President Kikkoman Zhenji Foods Co., Ltd., etc. through mutually-agreed price negotiation for a total cash consideration of \$260,830. The total carrying amount of non-controlling interest was \$279,658 at the acquisition dates. These transactions resulted in a decrease in non-controlling interest by \$279,658 and an increase in the equity attributable to owners of the parent by \$18,828.
- C.Some of the Group's subsidiaries had increased their capital through issuance of new shares during 2014. The Group did not subscribe proportionately to its shareholding percentage. As a result, non-controlling interest increased by \$7,742 and the equity attributable to owners of the parent decreased by \$7,742.
- D.In 2013, the Group disposed its subsidiaries - ScinoPharm Taiwan, Ltd., etc. through public market for a total cash consideration of \$92,937. The carrying amount of non-controlling interest was \$38,822 at the disposal date. These transactions resulted in an increase in the non-controlling interest by \$38,822 and an increase in the equity attributable to owners of the parent by \$54,115. In addition, some of the subsidiaries were liquidated in 2013, and the Group reversed the capital reserve resulting from the difference between carrying amount of investment and the interests in subsidiaries recognized in transactions with non-controlling interests in prior years. Such reversal increased the equity attributable to owners of the parent by \$1,468.
- E.In 2013, the Group acquired additional shares of its subsidiaries - Uni-President China

Holdings Ltd., etc. in public market for a total cash consideration of \$136,037. The carrying amount of non-controlling interest in these subsidiaries was \$76,166 at acquisition dates. These transactions resulted in a decrease in the non-controlling interest by \$76,166 and a decrease in the equity attributable to owners of the parent by \$59,871.

F. Some of the Group's subsidiaries had increased their capital through issuing new shares during 2013. The Group did not subscribe proportionately to its shareholding percentage. As a result, non-controlling interest increased by \$9,181 and equity attributable to owners of the parent decreased by \$9,181.

G. Based on the above transactions, the details of changes in the Group's capital reserve due to transactions with non-controlling interest in 2014 and 2013 are as follows:

	For the years ended December 31,	
	2014	2013
Acquisition of non-controlling interest:		
Carrying amount of non-controlling interest acquired	\$ 279, 658	\$ 76, 166

- (3)The details of endorsement and guarantees provided as at December 31, 2014 and 2013 are described in Note 13(1)-B.
- (4)In July 2000, President Chain Store Corp. signed a perpetual technical cooperation contract ('the Contract') with Southland Corporation. The terms of the Contract are as follows:
- A.The Company guarantees that President Chain Store Corp. will fulfill all payments or other obligations due under the Contract to Southland Corporation.
 - B.Without the written approval of Southland Corporation in advance, the Company may not sell, transfer, or pledge the ownership or the assets of President Chain Store Corp.
 - C.The Company should maintain no less than 40% ownership of President Chain Store Corp.
- (5)The Company entered into credit facilities agreements with the Bank of Tokyo-Mitsubishi in December 2013 and September 2014, respectively, terms of agreements were from December 31, 2013 to December 30, 2016 and September 30, 2014 to September 7, 2018, respectively. Under the terms of the agreements, the Company agreed that:
- A.The current ratio computed from the year-end audited non-consolidated financial statements shall not be below 75%.
 - B.The debt-to-equity ratio computed from the year-end audited non-consolidated financial statements shall not be above 150%.
 - C.The interest coverage ratio computed from the year-end audited non-consolidated financial statements shall not be below 150%.
 - D.The year-end audited consolidated tangible stockholders' equity shall not be less than \$30,000,000.
- (6)Due to the plasticizer food scandal, the Consumers' Foundation, Chinese Taipei (CFCT) filed a lawsuit against the Company with the Banciao District Court and claimed \$1,573,775 for punitive and damage penalty in March, 2012. The New Taipei District Court rendered its judgment on this case on October 17, 2013, and that the Company should pay \$88 to the plaintiff for damage penalty. In addition, the punitive penalty was not approved by the court because the Company was unaware of such plasticizer ingredient in its manufacturing process. The CFCT has filed an appeal with the Taiwan High Court.
- (7)In May and November 2010, Cayman President Holdings Ltd. and Uni-President Southeast Asia Holdings Ltd. borrowed from Mega International Commercial Bank and other banks under a 5-year syndicated credit facilities agreement from May 25, 2010 to May 25, 2015 and from December 17, 2010 to December 17, 2015, respectively. (8)Uni-President Development Corp. signed a "Build-Operate-Transfer Contract for the Construction, Development and Operation of a Mass Rapid Transit (MRT) Station" with the Taipei City Government in August 2004. The main contents of the contract are as follows:

- A.The contract includes the construction, development and operation of an MRT Station including all auxiliary structures and facilities.
- B.The Taipei City Government shall provide the right of use for the land located in Shin-Yi District Lot No. 3 to carry out the contract.
- C.The development and operation period is 50 years starting from the time the right of land is registered (date registered - October 15, 2004). On December 31, 2007, the Taipei City Government agreed that the period shall be extended (for a total of 484 days) due to processing of building capacity compensation and changes in design.
- D.Uni-President Development Corp. shall pay two kinds of royalty fees:

(a)Royalty fees for development

Total amount is \$2,500,000 and as of September 30, 2014, Uni-President Development Corp. has paid \$2,000,000. The remainder will be paid in accordance with the terms of the contract.

(b)Royalty fees for operations

Uni-President Development Corp. shall pay operation royalty fees to the Taipei City Government using the progressive increase method one year after the start of commercial operations.

E.Uni-President Development Corp. shall pay the rent to the Taipei City Government based on a fixed percentage of the proclamation land value one year after the start of commercial operations.

F.Uni-President Development Corp. shall transfer freely the operating right for the MRT Station to the Taipei City Government when the contract expires. Uni-President Development Corp. also agrees to enter into a new contract with the Taipei City Government to bring the MRT Station back into public ownership 5 years before the end of the contract. The new contract shall be finished within 6 months. In addition, Uni-President Development Corp. shall propose a detailed plan before entering into a new contract with regard to the rights and responsibilities of

the transfer of the MRT Station. Uni-President Development Corp. has obtained the license described above.

- (9) To sustain interim working capital, Ton Yi Industrial Corp. has signed a syndicated loan agreement with Taiwan Bank and Mega International Commercial Bank in 2012, 2011 and 2009, respectively. Ton Yi Industrial Corp. and its subsidiaries have to maintain consolidated debt-to-equity ratio of less than 180%, interest coverage ratio of over 200%, and the consolidated tangible stockholders' equity of not less than \$15,000,000. Under the terms of the loan agreement, if any of the financial ratios or regulations above had been violated, Ton Yi Industrial Corp. and its subsidiaries shall improve it within four months after the announcement of financial reports. Should Ton Yi Industrial Corp. meet the required financial ratios and regulations by then, it will not be considered as a violation of the agreement. The credit rate should be overcharged by 0.1% of annual floating rate from the day after the announcement of the financial report which violates the financial ratios or regulations above to the day before Ton Yi Industrial Corp. and its subsidiaries meet the required financial ratios. Otherwise, the banks have the rights to demand Ton Yi Industrial Corp. to pay off the loan balance immediately. The rights to use the loan balance will terminate automatically once Ton Yi Industrial Corp. fails to meet the regulations above, and cannot be used again unless agreed by majority of the above banks. However, if Ton Yi Industrial Corp. and its subsidiaries adopt IFRSs, and they fail to meet the required financial ratios, it will not be considered as a violation of the agreement. But Ton Yi Industrial Corp. shall communicate with Taiwan Bank about the required financial ratios which shall be agreed by majority of other banks.
- (10) The subsidiary, Ton-Yi Industrial Corp. ('Ton-Yi') entered into a land lease agreement (the 'Agreement') with Taiwan Sugar Corporation ('TSC') in July 1993, TSC agreed to grant the right of superficies for some of its land (located in Yong-Kang District, San Kan Dian 141-8) in Tainan City to Ton-Yi for 50 years. In return, Ton-Yi shall pay annual rent and an additional royalty fee for the right of superficies every 20 years. In 2013, the Agreement had been signed for 20 years but both sides have not reached a consensus about the amount of the said royalty fee. TSC is requesting for an amount of \$300,000, however, Ton-Yi argues the royalty fee should be \$52,600. Ton-Yi has paid to TSC the said royalty fee of \$52,600 in July 2013. TSC has filed a lawsuit against Ton-Yi and claimed for cancellation of the granted right of superficies. The lawsuit was filed with the Tainan District Court. On June 12, 2014, the Tainan District Court has rendered its judgment and disapproved the request from TSC for cancelation of the right of superficies granted to Ton-Yi. However, TSC has filed an appeal with the Taiwan High Court. Based on the evaluation of Ton-Yi and its legal counsel, the legal defense carried out by Ton-Yi has been accepted by the Tainan District Court and Ton-Yi has won the court case. The possibility for the same legal defense to be rejected by the court in the second instance would be remote. As a result, Ton-Yi did not recognize the additional royalty fee liability.

10. SIGNIFICANT DISASTER LOSS: None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE: None.

12. OTHERS

(1) Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders, maintain an optimal capital structure to both reduce the cost of capital and to meet the monetary needs of improving productivity. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

(2) Financial instruments

A. Fair value information of financial instruments

Except for items disclosed in the table below, the financial instruments not measured at fair value (including cash and cash equivalents, financial assets and liabilities at fair value through profit or loss, notes receivable, accounts receivable, other receivables, guarantee deposits paid, short-term borrowings, short-term notes and bills payable, notes payable, accounts payable, other payables and guarantee deposits received) are based on their book value as book value approximates to fair value. The fair value information of financial instruments measured at fair value is provided in Note 12 (3) Fair value estimation.

(Note) Recognized as "Other current assets" and "Other non-current assets".

B.Financial risk management policies

- (a)The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial position and financial performance.
- (b)Risk management is carried out by a central treasury department (Group treasury) under policies approved by the board of directors. Group treasury identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C.Significant financial risks and degrees of financial risks

- (a)Market risk

Foreign exchange risk

- (i) The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD and JPY. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.
- (ii) Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The group companies are required to hedge their entire foreign exchange risk exposure with the Group treasury. To manage their foreign exchange risk arising from future commercial transactions and recognised assets and liabilities, entities in the Group use forward foreign exchange contracts. However, hedge accounting is not applied as transactions did not meet all criteria of hedge accounting.
- (iii)The Group has certain investments in foreign operations, whose net assets are exposed to foreign currency translation risk.
- (iv)The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other certain subsidiaries' functional currency: USD, CYN, and HKD. The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(v)As of December 31, 2014 and 2013, if the NTD:USD exchange rate appreciates/depreciates

by 5% with all other factors remaining constant, the Company's post-tax profit for the years ended December 31, 2014 and 2013 would increase/decrease by \$100,337 and \$59,453, respectively. If the USD:CNY exchange rate appreciates/depreciates by 5%, with all other factors remaining constant, the Company's post-tax profit for the years ended December 31, 2014 and 2013 would increase/decrease by \$668,086 and \$339,487, respectively.

Price risk

The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated balance sheet either as available-for-sale or at fair value through profit or loss. The Group is not exposed to commodity price risk. To manage its price risk arising from investments in equity securities, the Group has carefully determined its investing portfolio and has set various stop loss points to ensure that stockholders are not exposed to significant risks.

The Group's investments in equity securities comprise domestic listed and unlisted stocks. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 2% with all other variables held constant, post-tax profit for the years ended December 31, 2014 and 2013 would have increased/decreased by \$11,363 and \$1,848 as a result of gains/losses on equity securities classified as at fair value through profit or loss, respectively. Other components of equity would have increased/decreased by \$55,514 and \$56,799 as a result of gains/losses on equity securities classified as available-for-sale, respectively.

Interest rate risk

The Group's interest rate risk arises from short-term borrowings, long-term borrowings and bonds payable. Borrowings issued at variable rates expose the Group to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rate. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. During the years ended December 31, 2014 and 2013, the Group's borrowings at variable rate were denominated in NTD, USD and RMB. During the years ended December 31, 2014 and 2013, if interest rates on borrowings had been 0.1% higher/lower with all other variables held constant, post-tax profit for the years ended December 31, 2014 and 2013 would have increased /decreased by \$39,590 and \$28,736, respectively, mainly as a result of higher/lower interest expense on floating rate borrowings.

(b) Credit risk

(i) Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. According to the Group's credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. The

utilisation of credit limits is regularly monitored. Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including outstanding receivables and committed transactions. For banks and financial institutions, only independently rated parties with good ratings are accepted.

- (ii) No credit limits were exceeded during the reporting periods, and management does not expect any significant losses from non-performance by these counterparties.
- (iii) For the credit ratings of the Group's financial assets, please refer to Note 6, "Financial assets".

(c) Liquidity risk

- (i) Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities.
- (ii) Surplus cash held by the Group treasury over and above the balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits, money market deposits and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the above mentioned forecasts. As of December 31, 2014 and December 31, 2013, the position of money market held by the Group can be found in Note 6, "Financial assets".
- (iii) The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(3) Fair value estimation

A. The table below analyses financial instruments measured at fair value, by valuation method. The different levels have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data.

The following table presents the Company's financial assets and liabilities that are measured at fair value at December 31, 2014 and 2013.

	December 31, 2014	Level 1	Level 2	Level 3	Total

(Note)The Group had obtained the ability to exercise significant influence in the operations of Prince Housing and Development Corp. ("Prince Housing"). Accordingly, the Group changed the accounting treatment for its investment in Prince Housing to the equity method retrospectively. Please refer to Note 6(8) for detailed information.

B.The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1. Instruments included in level 1 comprise primarily equity instruments and debt instruments classified as financial assets/financial liabilities at fair value through profit or loss or available-for-sale financial assets.

C.The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

D.If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

E. Specific valuation techniques used to value financial instruments include:

- (a) Quoted market prices or dealer quotes for similar instruments.
- (b) The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves.
- (c) The fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted back to present value.
- (d) Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

F. The following table presents the changes in level 3 instruments for the years ended December 31, 2014 and 2013.
