**CONSOLIDATED FINANCIAL STATEMENTS AND
REVIEW REPORT OF INDEPENDENT
ACCOUNTANTS**

JUNE 30, 2019 AND 2018

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

REVIEW REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of Uni-President Enterprises Corp.

Introduction

We have reviewed the accompanying consolidated balance sheets of Uni-President Enterprises Corp. and its subsidiaries as at June 30, 2019 and 2018, and the related consolidated statements of comprehensive income for the three-month and six-month periods then ended, as well as the consolidated statements of changes in equity and of cash flows for the six-month periods then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and International Accounting Standard 34, “Interim Financial Reporting” as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

Except as discussed in the following paragraph, we conducted our reviews in accordance with the Statement of Auditing Standards No. 65 “Review of Financial Information Performed by the Independent Auditor of the Entity” in the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As described in Note 4(3), the financial statements of certain non-significant subsidiaries and investments accounted for under the equity method were consolidated based on their unreviewed financial statements as of and for the three-month and six-month periods ended June 30, 2019 and 2018. Total assets of these subsidiaries and the investments amounted to \$138,627,402 thousand and \$120,078,236 thousand, representing 29.46% and 28.74% of the related consolidated totals, and total liabilities amounted to \$66,737,795 thousand and \$52,500,160 thousand, representing 22.10% and

20.43% of the related consolidated totals, as at June 30, 2019 and 2018, respectively. Total comprehensive income of these subsidiaries including share of profit of associates and joint ventures accounted for under the equity method of these investments amounted to \$1,965,778 thousand, \$2,549,130 thousand, \$5,188,677 and \$4,622,341 thousand, constituting 25.57%, 26.78%, 28.30% and 28.25% of the related consolidated totals for the three-month and six-month periods ended June 30, 2019 and 2018, respectively.

Qualified Conclusion

Based on our reviews, except for the effect of such adjustments, if any, as might have been determined to be necessary had the financial statements of certain non-significant subsidiaries and investee companies been reviewed by independent accountants as described in the preceding paragraph, that we might have become aware of had it not been for the situation described above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of Uni-President Enterprises Corp. as at June 30, 2019 and 2018, and of its consolidated financial performance for the three-month and six-month periods then ended, and its consolidated cash flows for the six-month periods then ended in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and International Accounting Standard 34, "Interim Financial Reporting" as endorsed by the Financial Supervisory Commission of the Republic of China.

UNI-PRESIDENT ENTERPRISES CORP. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)
(UNAUDITED)

1. HISTORY AND ORGANIZATION

- (1) Uni-President Enterprises Corp. (the “Company”) was incorporated as a company limited by shares under the provisions of the Company Law of the Republic of China (R.O.C.) in August 1967. The Company is primarily engaged in the manufacture, processing and sales of various soft drinks, food, animal feeds and flour. For more information regarding the manufacturing and trading activities the Company and its subsidiaries (the “Group”) are engaged in, please refer to Note 4(3), ‘Basis of consolidation’.
- (2) The common shares of the Company have been listed on the Taiwan Stock Exchange since December 1987.

2. THE DATE OF AUTHORIZATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORIZATION

These consolidated financial statements were reported to the Board of Directors on August 7, 2019.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

- (1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS”) as endorsed by the Financial Supervisory Commission (“FSC”)
New standards, interpretations and amendments as endorsed by FSC effective from 2019 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board (“IASB”)
Amendments to IFRS 9, ‘Prepayment features with negative compensation	January 1, 2019
IFRS 16, ‘Leases’	January 1, 2019
Amendments to IAS 19, ‘Plan amendment, curtailment or settlement’	January 1, 2019
Amendments to IAS 28, ‘Long-term interests in associates and joint ventures’	January 1, 2019
IFRIC 23, ‘Uncertainty over income tax treatments’	January 1, 2019
Annual improvements to IFRSs 2015-2017 cycle	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

IFRS 16, ‘Leases’

- (a) IFRS 16, ‘Leases’, replaces IAS 17, ‘Leases’ and related interpretations and SICs. The standard requires lessees to recognize a ‘right-of-use asset’ and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.

- (b) The Group has elected to apply IFRS 16 by not restating the comparative information (referred herein as the ‘modified retrospective approach’) when applying “IFRSs” effective in 2019 as endorsed by the FSC. Accordingly, the Group increased ‘right-of-use asset’ by \$64,449,390, ‘investment property’ by \$3,176, ‘lease liabilities’ by \$53,294,805 and decreased ‘prepayments’ by \$177,624, ‘property, plant and equipment’ by \$386,107, ‘long-term prepaid rents’ by \$11,461,236, and ‘other payables’ by \$867,206, with respect to the lease contracts of lessees on January 1, 2019.
- (c) The Group has used the following practical expedients permitted by the standard at the date of initial application of IFRS 16:
- i. Reassessment as to whether a contract is, or contains, a lease is not required, instead, the application of IFRS 16 depends on whether or not the contracts were previously identified as leases applying IAS 17 and IFRIC 4.
 - ii. The use of a single discount rate to a portfolio of leases with reasonably similar characteristics.
 - iii. The accounting for operating leases whose period will end before December 31, 2019 as short-term leases.
 - iv. The exclusion of initial direct costs for the measurement of ‘right-of-use asset’.
 - v. The use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.
- (d) The Group calculated the present value of lease liabilities by using the weighted average incremental borrowing interest rate ranging from 0.82% to 8.54% .
- (e) The Group recognized lease liabilities which had previously been classified as ‘operating leases’ under the principles of IAS 17, ‘Leases’. The reconciliation between operating lease commitments under IAS 17 measured at the present value of the remaining lease payments, discounted using the lessee’s incremental borrowing rate and lease liabilities recognized as of January 1, 2019 is as follows:

Operating lease commitments disclosed by applying IAS 17 as at

December 31, 2018 \$ 71,086,122

Add : Lease payable recognized under finance lease by applying IAS 17

as at December 31, 2018 6,962

Adjustments as a result of a different treatment of extension and
termination options 2,943,140

Less : Short-term leases (162,853)

Low-value assets (2,846)

Contracts reassessed as service agreements (151,729)

Unstarted but committed lease contracts (14,328,676)

Total lease contracts amount recognized as lease liabilities by applying
IFRS 16 on January 1, 2019

\$ 59,390,120

Incremental borrowing interest rate at the date of initial application

0.82% ~ 8.54%

Lease liabilities recognized as at January 1, 2019 by applying IFRS 16

\$ 53,294,805

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments as endorsed by FSC effective from 2020 are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IAS 1 and IAS 8, 'Disclosure Initiative-Definition of Material'	January 1, 2020
Amendments to IFRS 3, 'Definition of a business'	January 1, 2020
The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.	

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by IASB
IFRS 17, 'Insurance contracts'	January 1, 2021
The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.	

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the International Accounting Standards 34, 'Interim financial reporting' as endorsed by the FSC.

(2) Basis of preparation

- A. Except for the following items, the consolidated financial statements have been prepared under the historical cost convention:
 - (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
 - (b) Financial assets at fair value through other comprehensive income.
 - (c) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.
- B. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5, 'Critical accounting judgements, estimates and key sources of assumption uncertainty'.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

- (a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
- (b) Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
- (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.
- (e) When the Group loses control of a subsidiary, the Group measures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognized in profit or loss. All amounts previously recognized in other comprehensive income in relation to the subsidiary are reclassified to profit or loss, on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognized in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.

A. Foreign currency transactions and balances

- (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.
- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss.
- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within "Other gains and losses".

B. Translation of foreign operations

- (a) The operating results and financial position of all the group entities, associates and joint arrangements that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognized in other comprehensive income.
- (b) When a foreign operation as an associate or joint arrangement is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group retains partial interest in the former foreign associate or joint arrangement after losing significant influence over the former foreign associate, or losing joint control of the former jointly controlled entity, such transactions should be accounted for as disposal of all interest in these foreign operations.
- (c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, if the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;
 - (b) Assets held mainly for trading purposes;
 - (c) Assets that are expected to be realized within twelve months from the balance sheet date;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be paid off within the normal operating cycle;
 - (b) Liabilities arising mainly from trading activities;
 - (c) Liabilities that are to be paid off within twelve months from the balance sheet date;
 - (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

- A. Cash equivalents refer to short-term highly liquid investments that are readily convertible to known amount of cash and subject to an insignificant risk of changes in value.
- B. Time deposits, bills under repurchase agreements and commercial papers that meet the definition above and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognizes the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognizes the gain or loss in profit or loss.
- D. The Group recognizes the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognize changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets; and
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognized and derecognized using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:
 - (a) The changes in fair value of equity investments that were recognized in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognized as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
 - (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognized in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

(9) Financial assets at amortized cost

- A. Financial assets at amortized cost are those that meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortized cost are recognized and derecognized using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognized in profit or loss when the asset is derecognized or impaired.
- D. The Group's time deposits, structured deposits and negotiable certificates of deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial. The Group's demand deposits and time deposits pledged to others are consistent with the definition of financial assets at amortized cost, and expressed in "Other current assets" and "Other non-current assets".

(10) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(11) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortized cost, at each reporting date, the Group recognizes the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognizes the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognizes the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognizes a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has not retained control of the financial asset.

(13) Leasing arrangements (lessor)

Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.

(14) Inventories

A. The Company

Cost is determined using the weighted-average method. The cost of finished goods and work in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. Inventories are stated at the lower of cost and net realizable value. The item by item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses. When the cost of inventories exceeds the net realizable value, the amount of any write-down of inventories is recognized as cost of sales during the period; and the amount of any reversal of inventory write-down is recognized as a reduction in cost of sales during the period.

B. Subsidiaries

Except for President Chain Store Corp. and subsidiaries, Philippine Seven Corporation, President Drugstore Business Corp. and Uni-President Oven Bakery Corp., which adopt the retail method and Tone Sang Construction Corp. which adopts construction accounting, the other subsidiaries adopt the same accounting principle for inventories as the Company.

(15) Investments accounted for under the equity method - associates

- A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognized at cost.
- B. The Group's share of its associates' post-acquisition profits or losses is recognized in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognized in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognizes the Group's share of change in equity of the associate in 'capital reserves' in proportion to its ownership.
- D. Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the

associate but maintains significant influence on the associate, then ‘capital surplus’ and ‘investments accounted for under the equity method’ shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group’s ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.

- F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss.
- G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss or transferred directly to retained earnings, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it still retains significant influence over this associate, then the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- H. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss. If it still retains significant influence over this associate, then the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Investment accounted for under the equity method - joint ventures

The Group accounts for its interest in a joint venture under the equity method. Unrealized profits and losses arising from the transactions between the Group and its joint venture are eliminated to the extent of the Group’s interest in the joint venture. However, when the transaction provides evidence of a reduction in the net realizable value of current assets or an impairment loss, all such losses shall be recognized immediately. When the Group’s share of losses in a joint venture equals or exceeds its interest in the joint venture together with any other unsecured receivables, the Group does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the joint venture.

(17) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
- B. Subsequent costs are included in the asset’s carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

- C. Except for land, other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each component of property, plant and equipment is significant, it is depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Asset	Useful lives		
Buildings	1	~	55 years
Machinery and utilities equipment	1	~	30 years
Transportation equipment	1	~	20 years
Leasehold improvements	1	~	20 years
Other equipment	1	~	40 years

(18) Leasing arrangements (lessee) — right-of-use assets/ lease liabilities (Effective 2019)

- A. Leases are recognized as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognized as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate or the interest rate implicit in the lease.

Lease payments are comprised of the following:

- (a) Fixed payments, less any lease incentives receivable;
- (b) Variable lease payments that depend on an index or a rate;
- (c) Amounts expected to be payable by the lessee under residual value guarantees;
- (d) The exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and
- (e) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Group subsequently measures the lease liability at amortized cost using the interest method and recognizes interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognized as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

- C. At the commencement date, the right-of-use asset is stated at cost comprising the following:
 - (a) The amount of the initial measurement of lease liability;
 - (b) Any lease payments made at or before the commencement date;

- (c) Any initial direct costs incurred by the lessee; and
- (d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognized as an adjustment to the right-of-use asset.

(19) Leased assets/ leases (lessee) (Prior to 2019)

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the Group assumes substantially all the risks and rewards incidental to ownership of the leased asset.
- B. An operating lease is a lease other than a finance lease. Payments made under an operating lease (net of any incentives received from the lessor) are recognized in profit or loss on a straight-line basis over the lease term.

(20) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Except for land, investment property is depreciated on a straight-line basis over its estimated useful life of 2 to 55 years.

(21) Intangible assets

A. Right of operation

Under IFRIC 12, "Service Concession Agreement," the Group has entered into a contract with the government whereby the Group shall provide infrastructure for public transportation services. Based on the contract, the government grants the Group the right to operate and provide transportation services to the public. Such right is measured using the fair value of the infrastructure, recognized as an intangible asset, and amortized over the contract period of 50 years.

B. Trademarks and licenses

Separately acquired trademarks and licenses are stated at historical cost. Trademarks and licenses acquired in a business combination are recognized at fair value at the acquisition date. Trademarks and licenses have a finite useful life and are amortised on a straight-line basis over their estimated useful lives of 10 to 30 years.

C. Computer software

Computer software is stated at cost and amortized on a straight-line basis over its estimated useful life of 2 to 10 years.

D. Goodwill

Goodwill arises in a business combination accounted for by applying the acquisition method.

E. License agreement, customer list, expertise and other intangible assets

License agreement, customer list and expertise acquired in business combination are recognized at fair value at the acquisition date. Other intangible assets are separately acquired patents and

technology transfer royalties, etc. which are stated at historical cost. The latter have a finite useful life and are amortized on a straight-line basis over their estimated lives of 3 to 40 years.

(22) Impairment of non-financial assets

- A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior years no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognized.
- B. The recoverable amounts of goodwill are evaluated periodically. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognized in profit or loss shall not be reversed in the following years.
- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(23) Borrowings

- A. Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.
- B. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the drawdown occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

(24) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(25) Financial liabilities at fair value through profit or loss

- A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges or financial liabilities at fair value through profit or loss. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:
 - (a) Hybrid (combined) contracts; or
 - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
 - (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognized in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognized in profit or loss.
- C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognized in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognizing in profit or loss for loan commitments or financial guarantee contracts.

(26) Bonds payable

Ordinary corporate bonds issued by the Group are initially recognized at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to ‘finance costs’.

(27) Derecognition of financial liabilities

Financial liability is derecognized when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(28) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

(29) Non-hedging and embedded derivatives

- A. Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.
- B. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognized as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and financial assets at amortised cost based on the contract terms.

C. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(30) Provisions

Provisions (including decommissioning) are recognized when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense.

(31) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expenses in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expenses when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.

ii. Remeasurements arising on defined benefit plans are recognized in other comprehensive

- income in the period in which they arise and are recorded as retained earnings.
- iii. Past service costs are recognized immediately in profit or loss.
 - iv. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. And, the related information is disclosed accordingly.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employees' compensation is distributed by shares, the Group calculates the number of shares based on the closing market price at the previous day of the board meeting resolution.

(32) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
- B. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.

- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.
- F. A deferred tax asset shall be recognized for unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures, employees' training costs and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.
- G. The interim period income tax expense is recognized based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.
- H. If a change in tax rate is enacted or substantively enacted in an interim period, the Group recognizes the effect of the change immediately in the interim period in which the change occurs. The effect of the change on items recognized outside profit or loss is recognized in other comprehensive income or equity while the effect of the change on items recognized in profit or loss is recognized in profit or loss.

(33) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(34) Revenue recognition

A. Sales of goods

- (a) The Group manufactures and sells various soft drinks, food, animal feeds, sauces, vegetable oil, and medicines, etc. Sales are recognized when control of the products has transferred, being when the products are delivered to the wholesaler, the wholesaler has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the wholesaler's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the wholesaler, and either the wholesaler has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- (b) Revenue from these sales is recognized based on the price specified in the contract, net of the estimated sales discounts and volume discounts. The products are often sold with volume discounts based on estimated sales of each year. Accumulated experience is used to estimate and provide for the sales discounts and volume discounts, using the expected value method,

and revenue is only recognized to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. A refund liability is recognized for expected sales discounts and volume discounts payable to customers in relation to sales made until the end of the reporting period. As the time interval between the transfer of committed goods or service and the payment of customer does not exceed one year, the Group does not adjust the transaction price to reflect the time value of money.

- (c) A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Sale of goods — retail

- (a) The Group operates various chain of retail stores. Revenue from the sale of goods is recognized when the Group sells a product to the customer.
- (b) Payment of the transaction price is due immediately when the customer purchases the products. It is the Group's policy to sell its products to the end customer with a right of return. Therefore, a refund liability and a right to the returned goods (listed as "other current assets") are recognized for the products expected to be returned. Accumulated experience is used to estimate such returns using the expected value method. Because the number of products returned has been steady for years, it is highly probable that a significant reversal in the cumulative revenue recognized will not occur. The validity of this assumption and the estimated amount of returns are reassessed at each reporting date.
- (c) The Group operates a loyalty programme where retail customers accumulate points for purchases made which entitle them to discount on future purchases. The points provide a material right to customers that they would not receive without entering into a contract. Therefore, the promise to provide points to the customer is a separate performance obligation. The transaction price is allocated to the product and the points on a relative stand-alone selling price basis. The stand-alone selling price per point is estimated on the basis of the discount granted when the points are redeemed and on the basis of the likelihood of redemption, based on past experience. The stand-alone selling price of the product sold is estimated on the basis of the retail price. A contract liability is recognized for the transaction price which is allocated to the points and revenue is recognized when the points are redeemed or expire.

C. Sales of services

The Group provides services such as the operation of public transportation station, processing of packaging materials, establishing information system and management consulting, etc. Revenue from rendering services is recognized under the percentage-of-completion method when the outcome of services provided can be estimated reliably. The stage of completion of a service contract is measured by the percentage of the actual services performed as of the financial reporting date to the total services to be performed by surveys of work performed. If the outcome of a service contract cannot be estimated reliably, contract revenue should be recognized only to the extent that contract costs incurred are likely to be recoverable.

D. Incremental costs of obtaining a contract

Given that the contractual period lasts less than one year, the Group recognizes the incremental costs of obtaining a contract as an expense when incurred although the Group expects to recover those costs.

(35) Service concession arrangements

- A. The Group contracted with the government (grantor) a service concession arrangement whereby the Group shall provide construction of the government's infrastructure assets for public services and operate those assets during the term of the arrangement. When the term of the operating period expires, the underlying infrastructure assets will be transferred to the government without consideration. The Group allocates the fair value of the consideration received or receivable in respect of the service concession arrangement between construction services and operating services provided based on their relative fair values, and recognizes such allocated amounts as revenues in accordance with IFRS 15, 'Revenue from contracts with customers'.
- B. Costs incurred on provision of construction services or upgrading services under a service concession arrangement are accounted for in accordance with IFRS 15, 'Revenue from contracts with customers'.
- C. The consideration received or receivable from the grantor in respect of the service concession arrangement is recognized at its fair value. Such considerations are recognized as a financial asset or an intangible asset based on how the considerations from the grantor to the operator are made as specified in the arrangement. The Group recognizes a financial asset to the extent that it has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services, and recognizes an intangible asset to the extent that it receives a right (a license) to charge users of the public service.

(36) Government grants

Government grants are recognized at their fair value only when there is reasonable assurance that the Group will comply with any conditions attached to the grants and the grants will be received. Government grants are recognized in profit or loss on a systematic basis over the periods in which the Group recognizes expenses for the related costs for which the grants are intended to compensate.

(37) Business combinations

- A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognized

amounts of the acquiree's identifiable net assets.

- B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquire and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognized and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognized directly in profit or loss on the acquisition date.

(38) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chairman that makes strategic decisions.

5. Critical Accounting Judgements, Estimates and Key Sources of Assumption Uncertainty

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have no significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

- A. The Group associates with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote.
- B. Details of the Group's cash and cash equivalents pledged to others as collateral (listed as "Other current assets" and "Other non-current assets") as of June 30, 2019, December 31, 2018 and June 30, 2018 are described in Note 8, 'Pledged assets'.

- B. Impairment of property, plant and equipment is described in Note 6(14), 'Impairment on non-financial assets'.
- C. For more information regarding the Group's property, plant and equipment pledged to others as at June 30, 2019, December 31, 2018 and June 30, 2018, please refer to Note 8, 'Pledged assets'.

(10) Leasing arrangements – lessee (Effective 2019)

- A. The Group leases various assets including land, buildings and other equipment. Rental contracts are typically made for periods of 1 to 50 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose covenants, but leased assets may not be used as security for borrowing purposes.
- B. The carrying amount of right-of-use assets and the depreciation charge are as follows:

	For the three-month period		For the six-month period
	June 30, 2019	ended June 30, 2019	ended June 30, 2019
	Carrying amount	Depreciation charge	Depreciation charge

	<u>\$ 65,515,259</u>	<u>\$ 3,112,360</u>	<u>\$ 6,066,777</u>

- C. For the three-month and six-month period ended June 30, 2019, the additions to right-of-use assets were \$3,949,860 and \$6,873,866, respectively.

D. The information on income and expense accounts relating to lease contracts is as follows:

	For the three-month period ended June 30, 2019	For the six-month period ended June 30, 2019
<u>Items affecting profit or loss</u>		
Interest expense on lease liabilities	(\$ 272,220)	\$ 550,310)

Expense on leases of low-value assets	(18,352)	(37,663)
Expense on variable lease payments	(94,051)	(205,830)
Gain on sublease of right-of-use assets	<u>114,005</u>	<u>221,699</u>
	(\$ 560,637)	(\$ 940,429)

E. For the six-month period ended June 30, 2019, the Group's total cash outflow for leases was \$6,938,777.

F. Variable lease payments

- (a) Some of the Group's lease contracts contain variable lease payment terms that are linked to sales generated from a store or department store counter. For abovementioned stores, up to 3.26% of lease payments are on the basis of variable payment terms and are accrued based on the sales amount. Variable payment terms are used for a variety of reasons. Various lease payments that depend on sales are recognized in profit or loss in the period in which the event or condition that triggers those payments occurs.
- (b) A 1% increase in the aggregate sales amount of all stores with such variable lease contracts would increase total lease payments by approximately \$2,028.

G. The Group's leases not yet commenced to which the lessee is committed are business premises for the lessees, and the lease liabilities undiscounted amount for the six-month period ended June 30, 2019 is \$15,844,193.

(11) Leasing arrangements – lessor (Effective 2019)

- A. The Group leases various assets including investment property and other equipment. Rental contracts are typically made for periods of 1 and 25 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.
- B. Gain arising from operating lease agreements for the three-month and six-month period ended June 30, 2019 are as follows:

	For the three-month period ended June 30, 2019	For the six-month period ended June 30, 2019
Rent income	<u>\$ 702,124</u>	<u>\$ 1,288,442</u>
Rent income arising from variable lease payments	<u>\$ 1,134</u>	<u>\$ 2,875</u>

C. The maturity analysis of the lease payments under the operating leases is as follows:

- B. The fair value of the investment property held by the Group as at June 30, 2019, December 31, 2018 and June 30, 2018 ranged from \$17,290,714 to \$45,460,336, which were assessed based on the reports of independent appraisers. Valuations were made based on most recent transaction prices of similar and comparable properties, considering factors such as location, transaction scale, and purpose of use, etc.
- C. The Group purchased agricultural land under the names of own-cultivators for other uses in the future. The use of the land has not yet been determined, as a result, such land was recognized as 'Investment property.'
- D. No borrowing costs were capitalized as part of investment property.
- E. For more information regarding the impairment of investment property, please refer to Note 6(14), 'Impairment on non-financial assets'.
- F. For more information regarding investment property pledged to others as at June 30, 2019, December 31, 2018 and June 30, 2018, please refer to Note 8, 'Pledged assets'.

(20) Pensions

A. The Group has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Group contributes monthly an amount equal to 2%~15% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Group would assess the balance in the aforementioned labor pension reserve account by December 31 every year. If the account balance is not enough to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Group will make contribution for the deficit by end of March next year. Certain overseas subsidiaries of the Group adopt relative contribution plan in accordance with their respective local laws and local pension regulations. Relative information is shown below:

(a) For the aforementioned pension plan, the Group recognized pension costs of \$82,971, \$82,596, \$165,610 and \$184,990 for the three-month and six-month periods ended June 30, 2019 and 2018, respectively.

- (b) Expected contributions to the defined benefit pension plans of the Group for the next year is \$760,951.
- B. Effective July 1, 2005, the Group has established a defined contribution pension plan (the “New Plan”) under the Labour Pension Act, covering all regular employees with R.O.C. nationality. Under the New Plan, the Group contributes monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labour Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment. The subsidiaries in mainland China are subject to the government sponsored defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People’s Republic of China are based on a fixed percentage of employees’ monthly salaries and wages. Other than the monthly contributions, the Group has no further obligations. The pension costs under the defined contribution pension plans of the Group for the three-month and six-month periods ended June 30, 2019 and 2018 were \$744,781, \$756,248, \$1,511,876 and \$1,479,331, respectively.

(21) Share capital

- A. Movements in the number of the Company’s ordinary shares outstanding are as follows (unit: thousand shares):

	For the six-month periods ended June 30,	
	2019	2018
Balance as at January 1 and June 30	5,682,015	5,682,015

- B. As of June 30, 2019, the Company’s authorized capital was \$60,000,000, and the paid-in capital was \$56,820,154, consisting of 5,682,015 thousand shares of ordinary stock, with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected.

(22) Capital reserves

- A. Pursuant to the R.O.C. Company Law, capital reserves arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Law requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. Capital reserves should not be used to cover accumulated deficit unless the legal reserve is insufficient.

B. Movements of the Company's capital reserves for the six-month periods ended June 30, 2019 and 2018 are as follows:

	Share premium	Difference between the acquisition or disposal price and carrying amount of subsidiaries	Joint ventures accounted for under the equity method	Others	Total

- (a) Pursuant to the letter of the Business No. 10602420200 issued by the Ministry of Economic Affairs in September 2017, the Group transferred dividends of \$4,405 and \$10, which were expired and not received by the shareholders, to capital reserve for the six-month periods ended June 30, 2019 and 2018, respectively.
- (b) For more information regarding changes in difference between the acquisition or disposal price and carrying amount of subsidiaries, please refer to Note 6(33), 'Transactions with non-controlling interest'.

(23) Retained earnings

- A. Pursuant to the amended R.O.C. Company Law, the current year's after-tax earnings should be used initially to cover any accumulated deficit; thereafter 10% of the remaining earnings should be set aside as legal reserve until the balance of legal reserve is equal to that of paid-in capital. The legal reserve shall be exclusively used to cover accumulated deficit, to issue new stocks or distribute cash to shareholders in proportion to their share ownership. The use of legal reserve for the issuance of stocks or cash dividends to shareholders in proportion to their share ownership is permitted provided that the balance of such reserve exceeds 25% of the Company's paid-in capital.
- B. Since the Company is in a changeable industry environment and the life cycle of the Company is in a stable growth, the appropriation of earnings should consider fund requirements and capital budgets to decide how much earnings will be kept or distributed and how much cash dividends will be distributed. According to the Company's Articles of Incorporation, 10% of the annual net income, after offsetting any loss of prior years and paying all taxes and dues, shall be set aside as legal reserve. The remaining net income and the unappropriated retained earnings from prior years can be distributed in accordance with a resolution passed during a meeting of the Board of Directors and approved at the stockholders' meeting. Of the amount to be distributed by the Company, stockholders' bonuses shall comprise 50% to 100% of the unappropriated retained earnings, and the percentage of cash dividends shall not be less than 30% of dividends distributed.
- C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings. The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently. The Company reversed proportionately the special reserve previously set aside, due to use or disposal of relevant assets. When the aforementioned assets are classified as investment properties, the reversal of land will take place upon disposal or reclassification while properties, other than land, are to be reversed through the operating period.
- D. On June 20, 2018, the stockholders during their meeting resolved for the distribution of dividends from 2017 earnings of \$31,251,085, constituting \$5.5 (in dollars) per share as cash dividends. On June 18, 2019, the stockholders during their meeting resolved for the distribution of dividends

from 2018 earnings of \$14,205,039, constituting \$2.5 (in dollars) per share as cash dividends.

E. In accordance with relevant laws and regulations of R.O.C., the long-term equity investment accounted for using equity method – President Securities Corp. has set aside a special reserve for trading losses and default losses from the annual post tax profit. The special reserve shall not be used for any other purpose except for covering the losses of President Securities Corp. or, when the special reserve reaches 50% of the amount of paid-in capital, 50% of the special reserve may be used for capitalization. As of June 30, 2019, the Group recognized special reserve of \$105,429 in accordance with IAS 28, “Investments in Associates and Joint Ventures”.

10. SIGNIFICANT DISASTER LOSS: None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE: None.

12. OTHERS

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders, maintain an optimal capital structure to both reduce the cost of capital and to meet the monetary needs of improving productivity. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

(2) Financial instruments

A. Financial instruments by category

Details of financial instruments by category of the Group are described in Notes 6.

B. Financial risk management policies

- (a) The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial position and financial performance.
- (b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the board of directors. Group treasury identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD and JPY. Foreign exchange risk arises from future commercial transactions, recognized assets and liabilities and net investments in foreign operations.
- ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The group companies are required to hedge their entire foreign exchange risk exposure with the Group treasury. To manage their foreign exchange risk arising from future commercial transactions and recognized assets and liabilities, entities in the Group use forward foreign exchange contracts. However, hedge accounting is not applied as transactions did not meet all criteria of hedge accounting.
- iii. The Group has certain investments in foreign operations, whose net assets are exposed to foreign currency translation risk.
- iv. The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other certain subsidiaries' functional currency: USD, CNY and HKD. The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

- v. Total exchange (loss) gain, including realized and unrealized arising from significant foreign exchange variation on the monetary items held by the Group for the three-month and six-month periods ended June 30, 2019 and 2018 amounted to (\$904), \$60,352, \$30,186 and \$112,989, respectively.
- vi. Foreign exchange risk with respect to USD arises from the exchange gain or loss resulting from foreign currency translation of cash and cash equivalents, accounts receivable, other receivables, borrowings, accounts payable and other payables denominated in USD. As of June 30, 2019 and 2018, if the NTD:USD exchange rate appreciates/depreciates by 5% with all other factors remaining constant, the Group's profit for the six-month periods ended June 30, 2019 and 2018 would increase/decrease by \$30,990 and \$48,470, respectively. Foreign exchange risk with respect to USD:CNY primarily arises from the exchange gain or loss resulting from foreign currency translation of cash and cash equivalents, accounts receivable, accounts payable and borrowings denominated in USD. If the USD:CNY exchange rate appreciates/depreciates by 5%, with all other factors remaining constant, the Group's profit for the six-month periods ended June 30, 2019 and 2018 would increase/decrease by \$36,683 and \$72,787, respectively.

Price risk

- i. The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.

ii. The Group's investments in equity securities comprise equity securities issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 2% with all other variables held constant, post-tax profit for the six-month periods ended June 30, 2019 and 2018 would have increased/decreased by \$34,579 and \$32,678, respectively, as a result of gains/losses on equity securities classified as at fair value through profit or loss. Other components of equity would have increased/decreased by \$75,428 and \$75,724, respectively, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

- i. The Group's interest rate risk arises from short-term borrowings, long-term borrowings and bonds payable. Borrowings issued at variable rates expose the Group to cash flow interest rate risk which is partially offset by cash and cash equivalents held at variable rate. Borrowings issued at fixed rates expose the Group to fair value interest rate risk.
- ii. During the six-month periods ended June 30, 2019 and 2018, the Group's borrowings at variable rate were denominated in NTD, USD and CNY. During the six-month periods ended June 30, 2019 and 2018, if interest rates on borrowings had been 0.1% higher/lower with all other variables held constant, post-tax profit for the six-month periods ended June 30, 2019 and 2018 would have decreased/increased by \$35,886 and \$25,370, respectively, mainly as a result of higher/lower interest expense on floating rate borrowings.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms, and the contract cash flows of debt instruments stated at amortized cost, at fair value through profit or loss and at fair value through other comprehensive income.
- ii. For bank and financial institutions, only high credit rating are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. The utilization of credit limits is regularly monitored.
- iii. The Group adopts the following assumptions to assess whether there has been a significant increase in credit risk on that instrument since initial recognition:
 - (i) If the contract payments were past due over certain number of days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.
 - (ii) If any external credit rating agency rates these bonds as investment grade, the credit risk

of these financial assets is low. If the credit rating grade of an investment target degrades two scales, there has been a significant increase in credit risk on that instrument since initial recognition.

- iv. The Group adopts management of credit risk, whereby the default occurs when the contract payments are past due over certain number of days.
- v. The Group classifies customer's accounts receivable in accordance with credit rating of customer, collaterals, credit risk on trade, etc. The Group applies the simplified approach using provision matrix, loss rate methodology to estimate expected credit loss under the provision matrix basis. The Group uses the forecastability of conditions to adjust historical and timely information to assess the default possibility of accounts receivable. Movements in relation to the group applying the simplified approach to provide loss allowance for notes receivable, accounts receivable and other receivables are as follows:

	For the six-month periods ended June 30,	
	2019	2018
January 1	\$ 428,163	\$ 425,795
Expected credit (gains) losses	(1,526)	11,920
Write-offs	(18,536)	(18,604)
Effect of business combinations	20,885	-
Effect of foreign exchange	3,560	1,539
June 30	\$ 432,546	\$ 420,650

- vi. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
 - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
 - (ii) The disappearance of an active market for that financial asset because of financial difficulties;
 - (iii) Default or delinquency in interest or principal repayments;
 - (iv) Adverse changes in national or regional economic conditions that are expected to cause a default.
- vii. No credit impairment of debt instruments has occurred for the six-month periods ended June 30, 2019 and 2018.

(c) Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities.

- ii. Surplus cash held by the Group treasury over and above the balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits, money market deposits and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient headroom as determined by the abovementioned forecasts. As of June 30, 2019, December 31, 2018 and June 30, 2018, the position of money market held by the Group is shown in Note 6, 'Financial assets', that are expected to readily generate cash flows for managing liquidity risk.
- iii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks, beneficiary certificates, on-the-run Taiwan central government bonds and derivative instruments with quoted market prices is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in forward exchange is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in certain derivative instruments and equity investment without active market is included in Level 3.

B. Fair value information of investment property at cost is provided in Note 6(12), 'Investment property'.

C. The fair value of the Group's financial assets and financial liabilities not measured at fair value

including the carrying amounts of cash and cash equivalents, financial assets at amortised cost, notes receivable (including related parties), accounts receivable (including related parties), other receivables, guarantee deposits paid, short-term borrowings, short-term notes payable, notes payable (including related parties), accounts payable (including related parties), and other payables, long-term liabilities - current portion, corporate bonds payable, long-term borrowings, and guarantee deposits received are approximate to their fair values.

D. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities are as follows:

E. The methods and assumptions the Group used to measure fair value are as follows:

- (a) The instruments that the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund	Government bond	Convertible bond
Market quoted price	Closing price	Net asset value	Closing price	Closing price

- (b) Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.

- (c) When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- (d) Forward foreign exchange contracts are usually valued based on the current forward exchange rate.
- (e) The market approach is used by the Group to measure its assets held for disposal (Price-to-Sales Ratio, P/S ratio), which is calculated as the ratio of recent identical or similar transaction price to sales as an observable input to project the fair value of the disposal group.
- (f) The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
- (g) The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

F. For the six-month periods ended June 30, 2019 and 2018, there was no transfer between Level 1 and Level 2. Foresight Pharmaceuticals Co., Ltd. had been listed on the Taipei Exchange from June 2018, therefore, the Group transferred the fair value from Level 2 to Level 1 at the end of the month when the event occurred.

G. The following chart is the movement of level 3 for the six-month periods ended June 30, 2019 and 2018:

H. Financial planning division is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.

- I. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:
